AL-RIYADA COLLEGE FOR HEALTH SCIENCES · MEDICAL HRMS

Round 2: What's New and How to Test

Only what changed in this round: drafts, rejection reasons, the history of each request, notifications, sending a rejected request again, and the Instructor form fix. The full User Guide stays the reference for everything else.

FOR	The testing team (and HR, to see what is new).
TEST CASES	17 cases: in the Test Cases workbook, filter the **Round** column on **Round 2**. They are listed in section 5.
VERSION	27 October 2026 · branch `develop`
BUILT BY	Abdul Hakeem (Medical HRMS and Jameah lead)
SEE ALSO	User Guide (updated for Round 2) · Installation and Setup Guide

1 What is new

Change	Who sees it	Tracker	Test cases
Drafts can be changed, sent or deleted	Employees, on the Employee Portal	HR-16	TC-ESS-17, 18
A reason is required to reject	HR and leave approvers give it; the employee reads it	HR-25	TC-APR-02, 09, 11, TC-ESS-19
History of each request	Employees: every step with who and when	HR-25	TC-ESS-19
Notifications (bell, and e-mail on the live server)	HR: new requests. Employees: every later step	HR-25	TC-APR-10, TC-ESS-22, 23, TC-LV-19
Send a rejected request again	Employees send it; HR sees which request it replaces	HR-16	TC-ESS-20, 21, TC-APR-12, TC-LV-18
Instructor and Academic Advisor forms save after picking an Employee	Academic Affairs, whoever links staff records	B-26, B-56 (HR-48)	TC-EMP-13, 14
Amount limits say SAR (not AED)	HR, Finance	HR-24	TC-APR-13

Nothing else changed: Round 1 test cases keep their results, and only **TC-APR-02** (rejecting a Training Request) has new steps, because a reason is now required.

2 Before you start

1. Ask the developer to confirm that the test site has the Round 2 update (branch `develop` of 27 October, with `bench migrate`). On the HR form of any request, a **Rejection Reason** field appears when the Status is set to *Rejected*: that shows the update is in.
2. Logins (sheet *Test Accounts*): an HR Manager, an employee whose leave approver you can also log in as, and for TC-EMP-13 / 14 a login that can edit Instructors **and** see Employees (for example Education Manager + HR User, or System Manager).
3. Open `Medical_HRMS_Jameah_Test_Cases.xlsx`, sheet *Test Cases*, filter **Round = Round 2**. Record each result there as in Round 1; bugs go in *Bug Report* with the date, time, page address and exact message.

> **E-mail on the test copy**
>
> The test copy cannot send e-mail (bug B-25: the e-mail account password must be entered again on the server). Notifications still appear in the bell. Mark **TC-ESS-23** and the e-mail part of **TC-LV-19** *Blocked* unless you test on a server where e-mail works.

3 How to test each change

3.1 Drafts: change, send or delete

Until now a draft could only be saved. Now the employee opens it again:

1. Employee Portal → click **N request(s)** on the card (for example Salary Certificate) → click the draft.
2. **Edit Draft** opens the form with what was saved. Change it, then **Save Draft** (keep it) or **Send Request** (send it for review). The request keeps its number.
3. **Delete Draft** → **Yes** removes it. A request that was already sent cannot be changed or deleted by the employee.

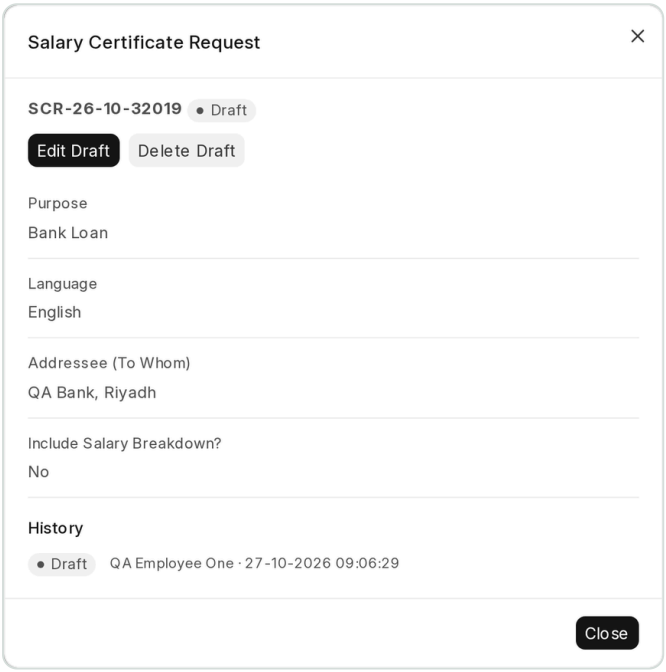

Figure 1. A draft: Edit Draft and Delete Draft.

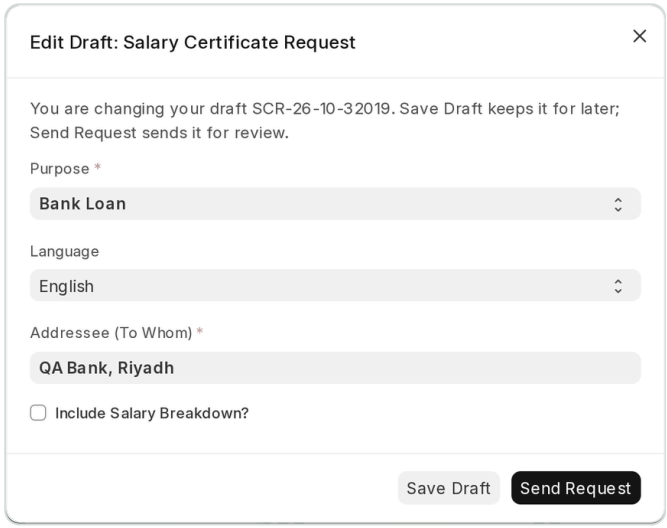

Figure 2. Edit Draft opens the form filled in.

3.2 Rejecting with a reason (HR)

1. Open a pending request (HR Portal → the request card → **Open**).
2. Set **Status** to *Rejected*. The field **Rejection Reason** appears and is required.
3. Click **Save** without a reason: *Missing Fields: Rejection Reason*, nothing is saved. Write the reason and save.
4. If a rejected request is set back to a pending step, the reason is cleared (it no longer applies).

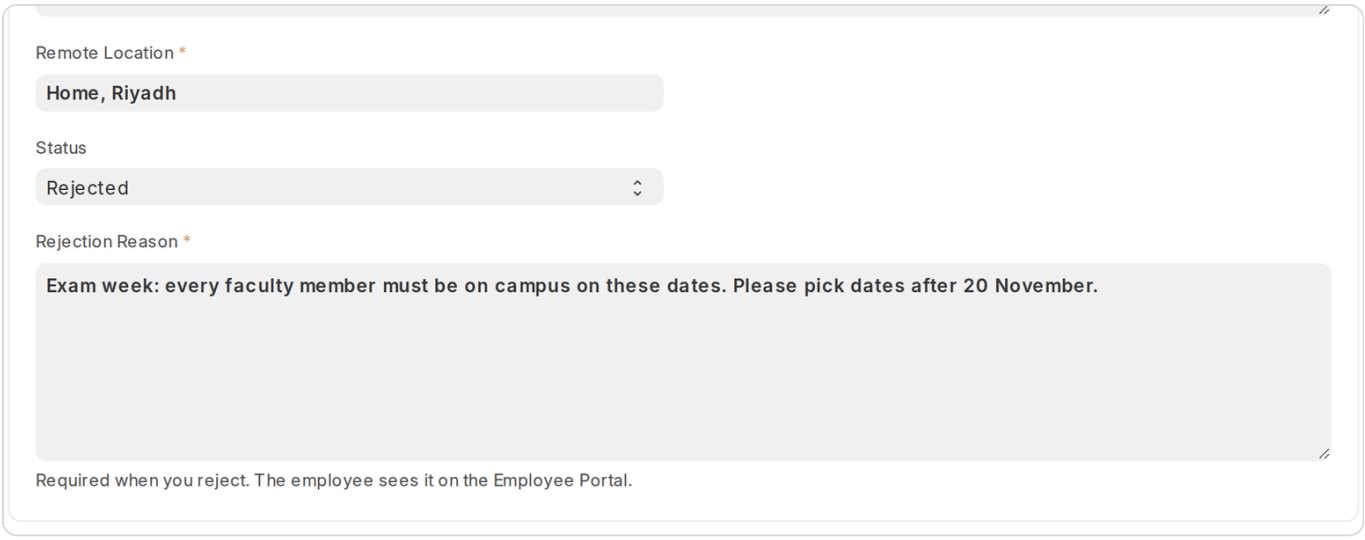

Figure 3. The request form with Status *Rejected* and the required Rejection Reason.

This applies to every request with a *Rejected* step: Permission, Remote Work, Leave Plan, Salary Certificate, Overtime, Training, Medical Allowance, Company Car, Contract Renewal, and Leave Application.

3.3 What the employee sees: reason, history, Send Again

The employee opens the request (Recent Requests → **View details**, **N request(s)** on a card, or the notification):

- **Rejection reason**: HR's text, in a box under the status.
- **History**: every step with the person and the time (for example *Pending Manager*, then *Rejected*).
- **Send Again**: opens a new request filled in from the rejected one. After sending, the new request says *Sent again in place of …* and the rejected one says *Sent again as ….* A rejected request can be sent again **once**.

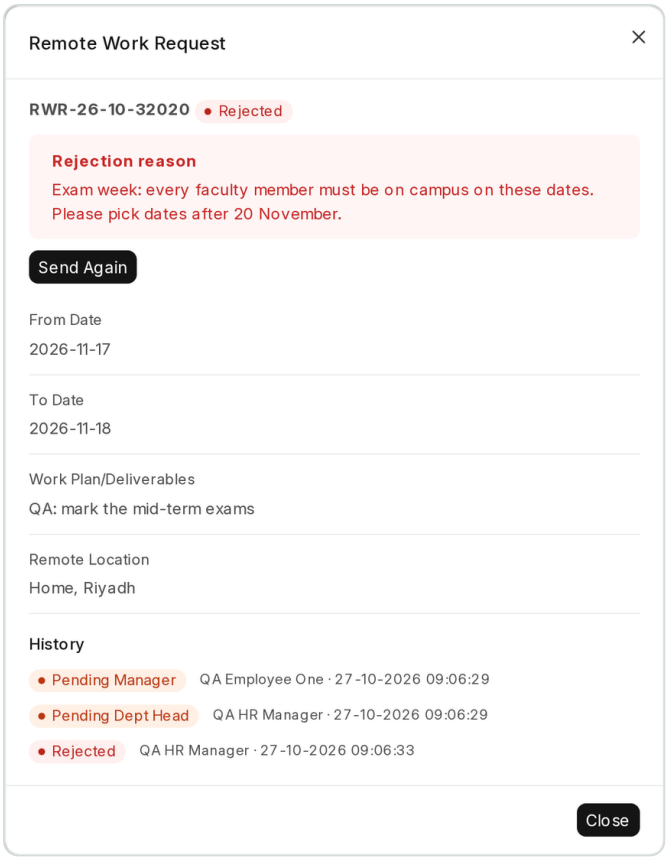

Figure 4. A rejected request: reason, Send Again, history.

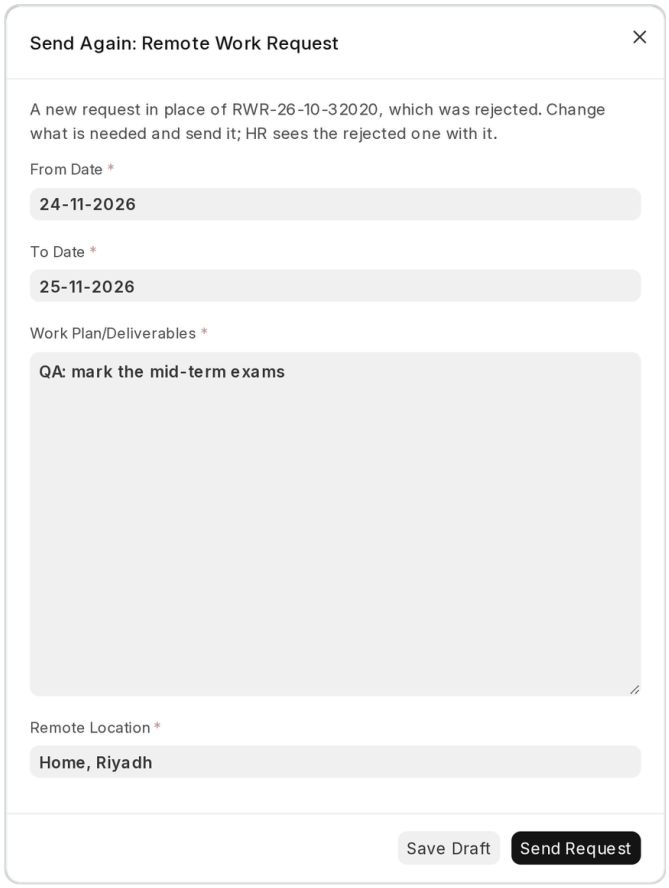

Figure 5. Send Again: a new request, filled in.

On the HR side, the new request shows **Sent Again From** with a link to the rejected one and its reason (TC-APR-12).

3.4 Notifications

When	Who is told	Text
An employee sends a request	Every HR User and HR Manager login	New <request> from <employee> (<number>)
HR moves it to another step, approves, issues or rejects it	The employee	Your <request> <number> is now <status> (with the reason when rejected)
A draft is saved or changed	Nobody	—

Notifications appear under the **bell** at the top of both portals (a red dot shows new ones). Clicking an employee's notification opens that request on the Employee Portal. On a server where e-mail works, the same text is also e-mailed. Leave applications are not in the bell: they keep their own e-mails (sent by HRMS) to the leave approver when an employee applies and to the employee when the application is approved, rejected or cancelled, now with two new templates that the migrate chooses in HR Settings (TC-LV-19).

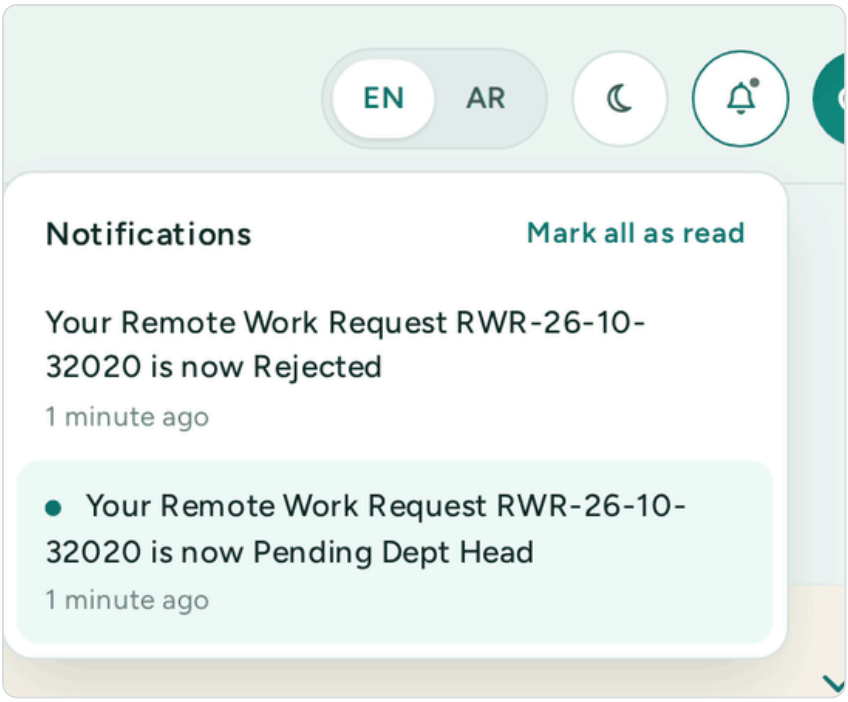

Figure 6. The employee's bell after a rejection.

3.5 Leave: reason and Apply Again

- The leave approver who rejects a Leave Application must fill **Rejection Reason** before saving and submitting (TC-APR-09).
- The employee sees the reason in the application's details and can click **Apply Again** to send a new application, filled in from the rejected one (TC-LV-18).
- Where e-mail works, the employee's e-mail about the rejection includes the reason, and its **Open Now** button opens the application on the Employee Portal (TC-LV-19).

3.6 Instructor and Academic Advisor: linking an Employee

Picking the Employee on an Instructor form used to stop the save with *Could not find Gender: Gender::1, Department: …*, because the form copied the Employee's values into its own lists, which hold different values. Now the matching **Gender** and **Department** are filled in instead, and the form saves. The Academic Advisor form had the same problem with Gender and is fixed too.

1. Open an Instructor that has no Employee yet (or clear the Employee field).
2. Pick the person's Employee record. Department fills in when that department exists in the academic list; Gender fills in too, or, for a login that cannot open the Gender list (only System Managers can), when you save.
3. Save: no error, and Gender is set.

3.7 Amounts in SAR

The messages for the approval limits on training, travel and expense claims now say **SAR**, for example *Training programs exceeding SAR 10,000 require Department Head approval.* (TC-APR-13).

4 Not in this round, and known limits

- **E-mail**: works only once the e-mail account is fixed on the server (B-25, HR-47). The bell works everywhere.
- **Who gets new-request notifications**: every HR User and HR Manager login, as built. If HR wants a smaller group, that is a decision (DEC-16).
- **Update My Data** and **Leave Return** have no *Rejected* step, so they have no rejection reason or Send Again (unchanged). Applying an approved data correction to the Employee record is HR-17, planned for a later round.
- **Who approves each step** (manager, department head, Finance) is still recorded by HR in the Status; automatic routing waits for the approver list (DEC-09, HR-24).
- The phone example on the public application form (+94 …) is being changed to a Saudi number by Fathir (HR-77); it is not part of this round's tests.

5 Round 2 test cases

Full steps and expected results are in the Test Cases workbook (filter **Round = Round 2**).

> **Already checked by the developer**
> The automated browser tests ran the same steps for the cases marked with an automated test in the workbook (column *Last automated run*). Please test them anyway: they can pass there and still fail for you.

ID	Scenario	Login	Priority
TC-ESS-17	Change a draft and send it	Employee	High
TC-ESS-18	Delete a draft	Employee	Medium
TC-APR-02	Reject a Training Request with a reason (changed)	HR Manager	High
TC-APR-09	Rejection reason on every request type and on leave	HR Manager, leave approver	High
TC-APR-11	Set a rejected request back to a pending step	HR Manager	Low
TC-ESS-19	See why a request was rejected (reason, history)	Employee	High
TC-ESS-20	Send a rejected request again	Employee	High
TC-ESS-21	A rejected request is sent again only once	Employee	Low
TC-APR-12	A request sent again shows the rejected one	HR Manager	Medium
TC-LV-18	Apply again after a rejected leave	Employee	Medium
TC-APR-10	HR is told about a new request (bell)	HR Manager	High
TC-ESS-22	Notifications in the bell	Employee	High
TC-ESS-23	Notification e-mail (live server only)	Employee	Medium

ID	Scenario	Login	Priority
TC-LV-19	Leave e-mail templates (the e-mails: live server only)	HR Manager, leave approver	Medium
TC-EMP-13	Link an Employee on the Instructor form	Education Manager + HR User	High
TC-EMP-14	Link an Employee on the Academic Advisor form	Education Manager + HR User	Medium
TC-APR-13	Amount limits are in SAR	HR Manager	Low
