1 Getting started

1.1 Logging in

Open the college system in your browser and log in with your college e-mail and password. The system takes you to your own page:

You are	You land on
HR Manager or HR officer	The **HR Portal** (`/app/hr-dashboard`)
Employee	The **Employee Portal** (`/app/employee-dashboard`)
Instructor, Head of Department, advisor	Your own college portal, as before. If you also have an Employee record you can open the Employee Portal for your requests and leave.

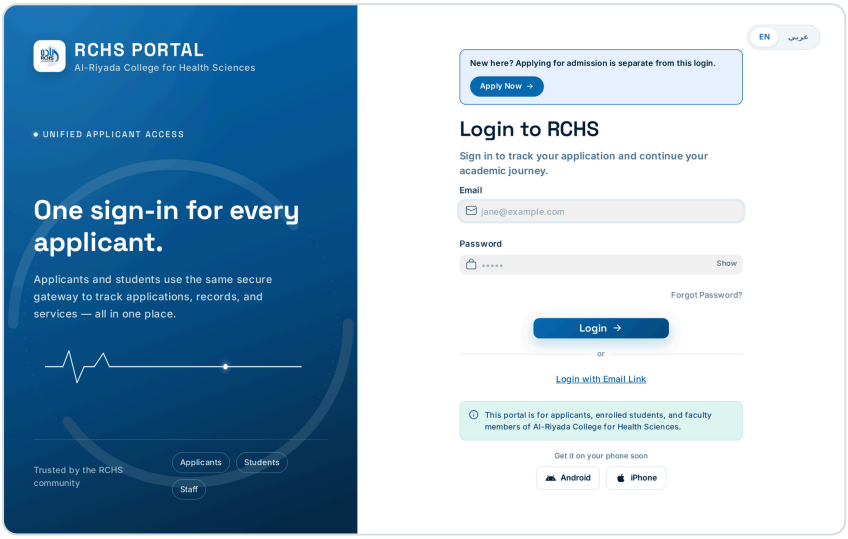

Figure 1. The login page.

1.2 The portal screen

Both portals look the same. On the left is the **menu**, grouped in sections; at the top, the **breadcrumb** (where you are), the **EN / AR** language switch, dark mode, notifications and your account menu (My Profile, My Settings, Log out). **Collapse menu** at the bottom gives more room. On a phone the menu opens from the menu button at the top.

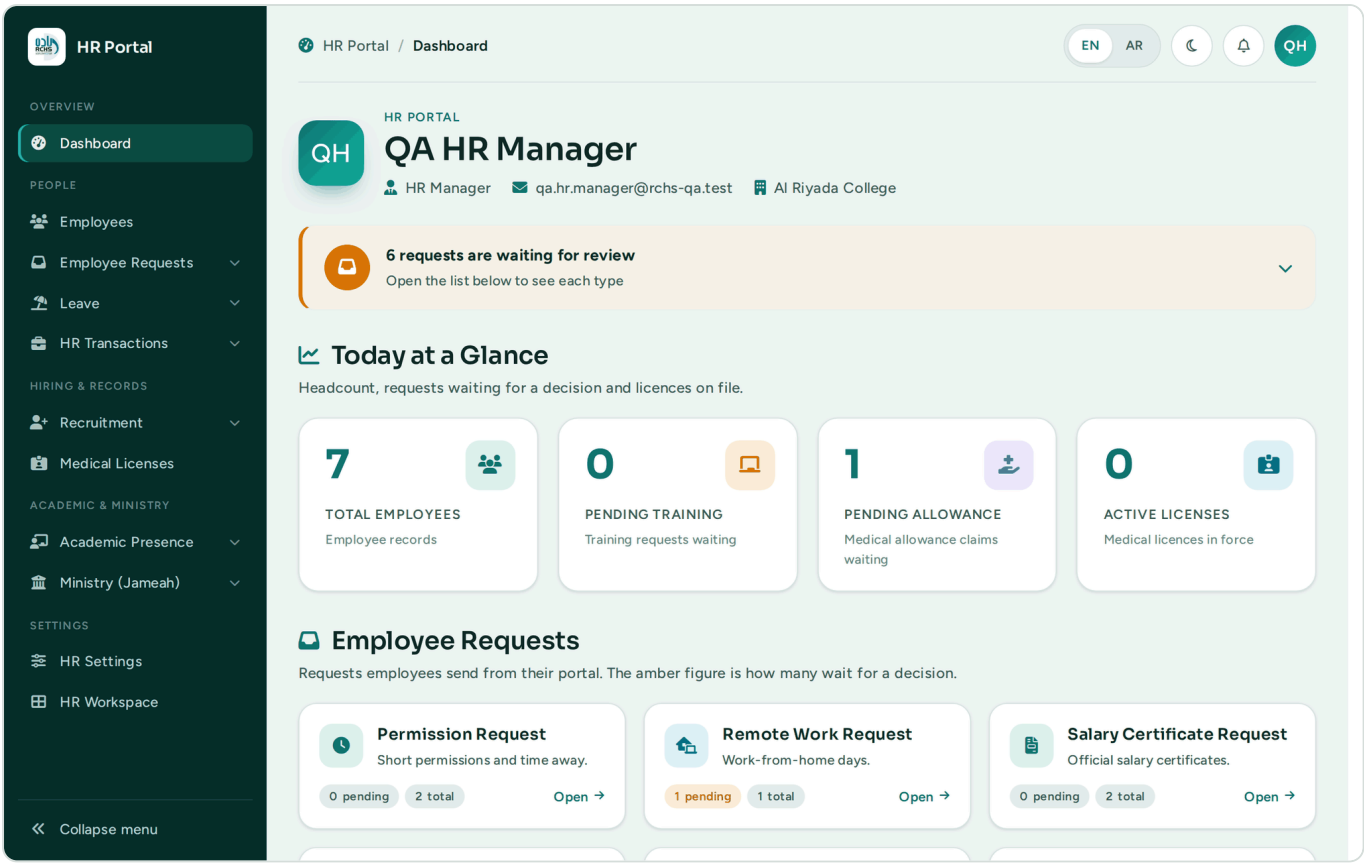

Figure 2. The HR Portal. The menu only shows pages you are allowed to open.

1.3 Arabic and English

Click **AR** or **EN** at the top. The page reloads in that language and remembers your choice; Arabic pages read right to left.

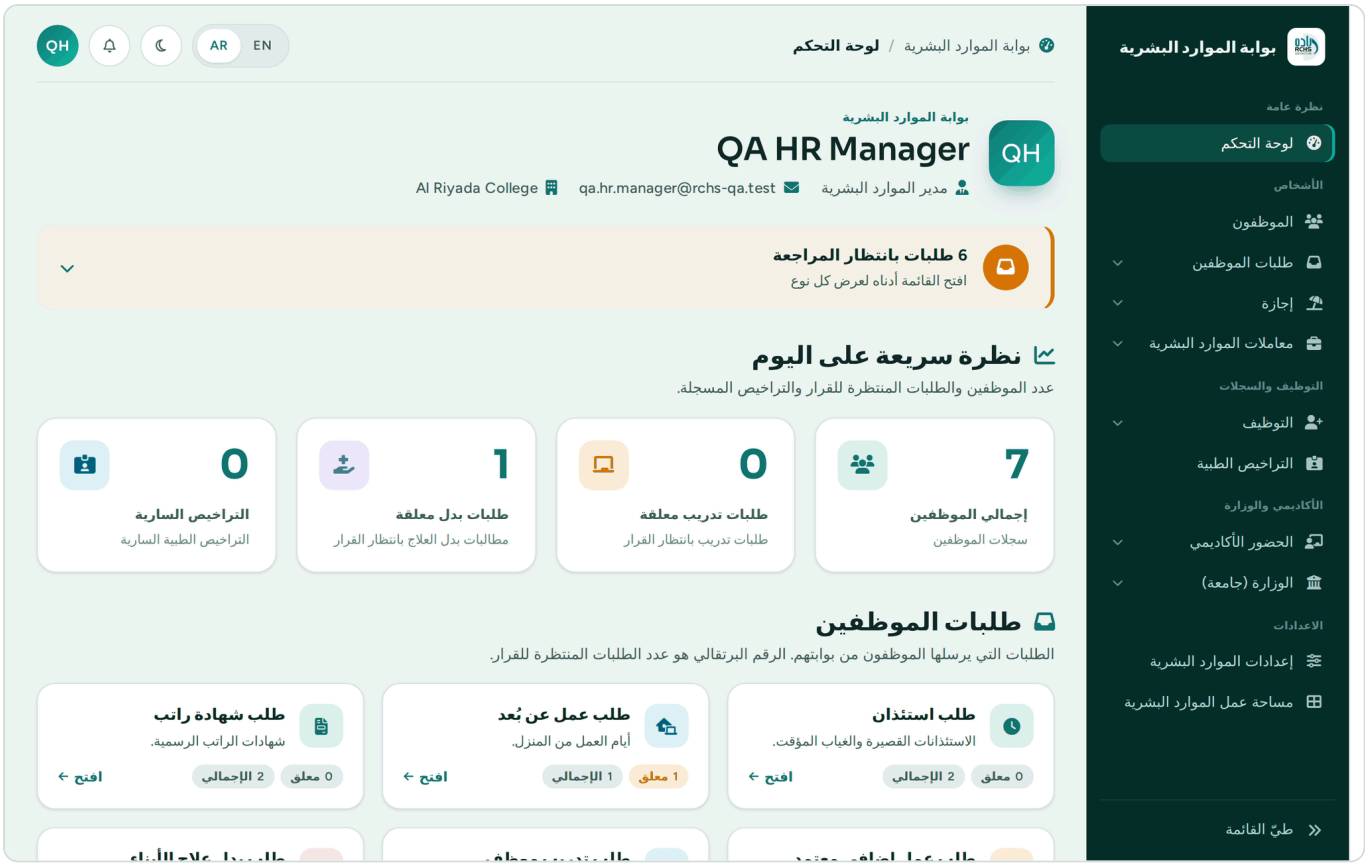

Figure 3. The HR Portal in Arabic.

2 Employees: the Employee Portal

2.1 Your dashboard

At the top are your name, department, designation and Employee ID, then a reminder of anything waiting for a decision, and four counters: **My Requests**, **Pending**, **Approved** and **Leave Applications**.

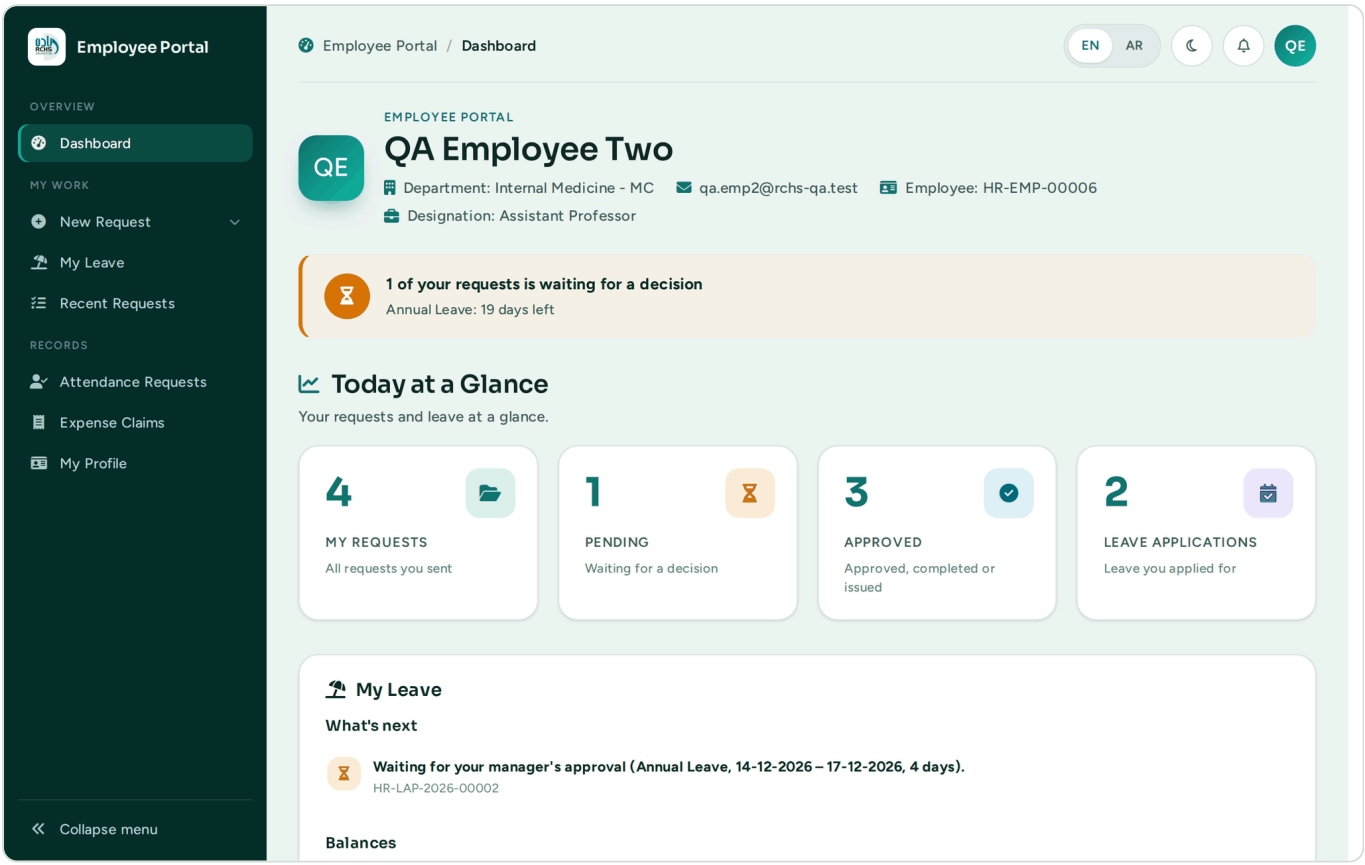

Figure 4. The Employee Portal.

2.2 My Leave

The **My Leave** panel tells you what to do next and how much leave you have.

- **What's next**: for example a leave waiting for your manager, a planned leave you can now apply for (**Apply now**), or a leave that ended and needs a return (**Send Leave Return**).
- **Balances**: for each leave type, the days Allocated, Taken, Waiting for approval and Left.
- **This month's limits**: half-day leave and work-from-home days used this month, if HR switched these limits on.

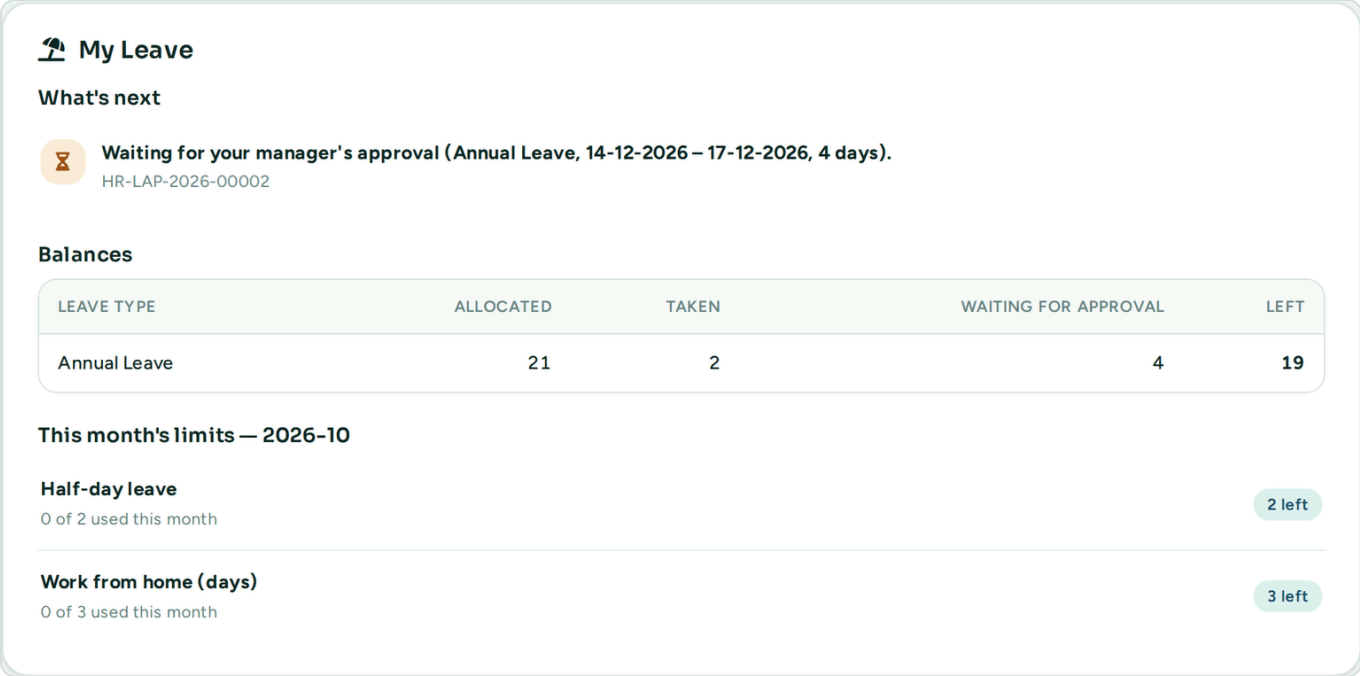

Figure 5. My Leave.

Leave follows one flow, and the three leave cards come first on your dashboard in that order:

1 Leave Plan → 2 Leave Application → manager approves → 3 Leave Return

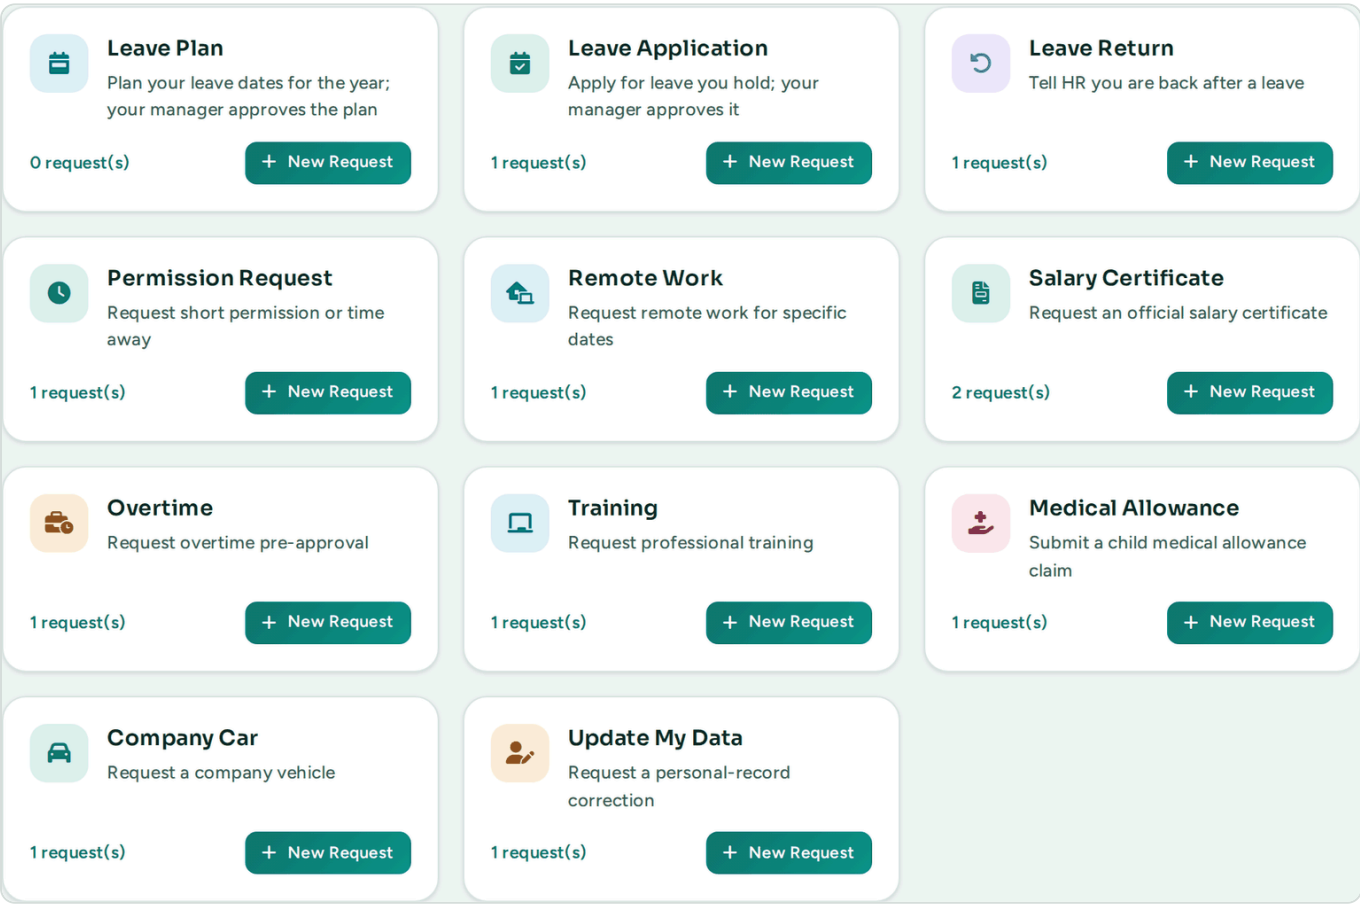

Figure 6. The request cards. **New Request** opens the form; "N request(s)" lists the ones you sent.

2.3 Planning leave (Leave Plan)

1. Click **Leave Plan → New Request.**

2. Choose the leave type and the dates you plan to take, add a note if you like, and click **Send Request**.
3. Your manager and then your department head approve the plan. A plan does **not** use your balance.
4. When the time comes, My Leave shows "Plan approved"; click **Apply now**. The leave application opens with the plan's dates filled in.

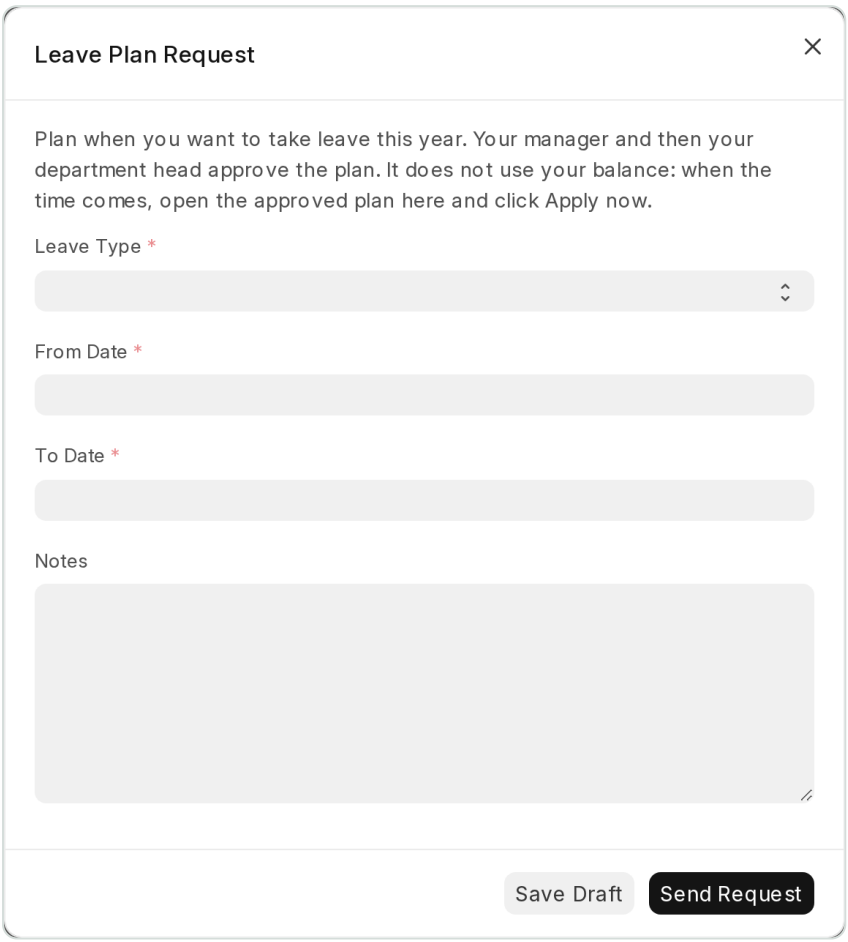

Figure 7. Leave Plan.

2.4 Applying for leave (Leave Application)

1. Click **Leave Application → New Request** (or **Apply now** on an approved plan).
2. Pick the **Leave Type**. Only leave you hold is listed, with the days you have left, for example *Annual Leave (21 days left)*. *Leave Without Pay* is last: agree it with HR first.
3. Enter the dates (tick **Half Day** for half a day) and the reason, then **Send Request**.
4. Your leave approver approves it and HR is informed. You see the result in My Leave and in your requests.

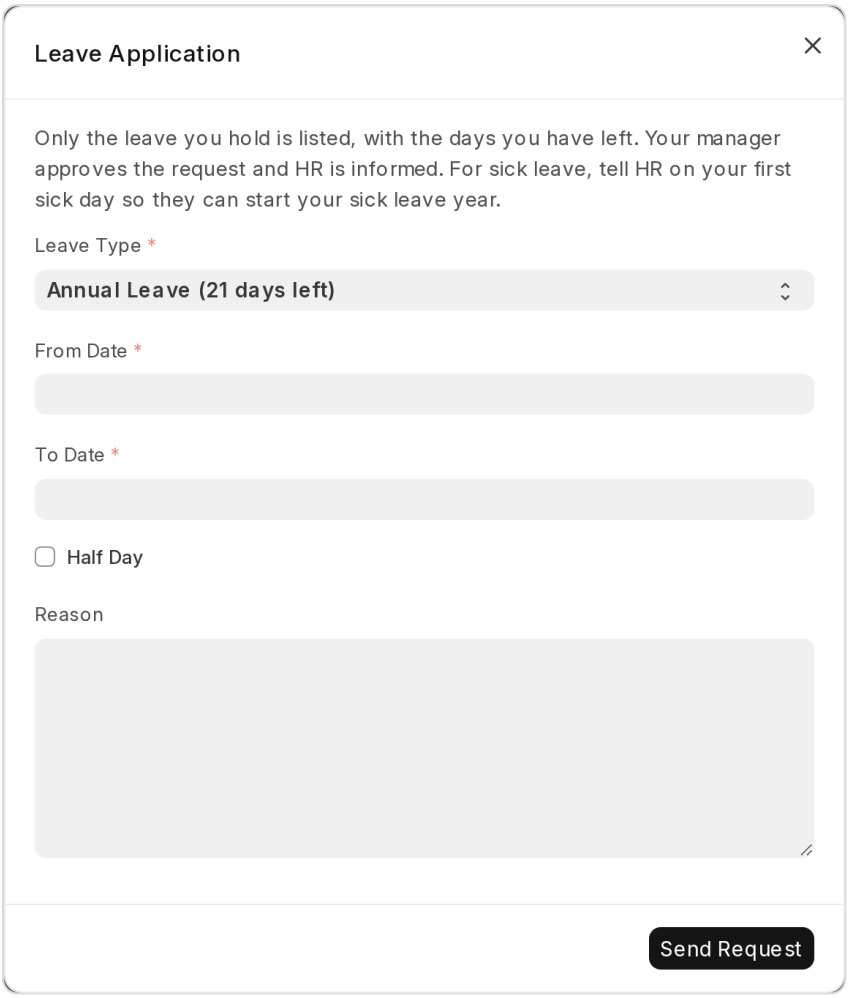

Figure 8. Leave Application. The days count working days only; holidays in the holiday list are not counted.

2.5 Coming back from leave (Leave Return)

1. When a leave has ended, My Leave shows "Your leave ended on …"; click **Send Leave Return** (or **Leave Return → New Request**).
2. The leave and the expected return day (the day after the leave) are filled in. Enter the day you actually came back.
3. After **sick leave**, attach your **fitness certificate**. It is not asked for after other leave.
4. Click **Send Request**. HR completes the return; after sick leave, occupational health clears you first.

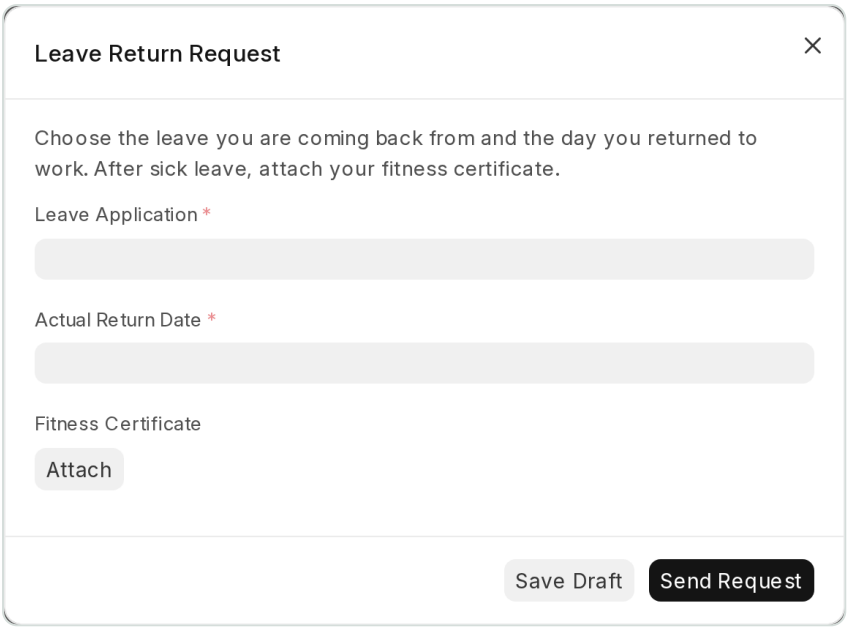

Figure 9. Leave Return. Only your approved leave can be chosen, and each leave has one return.

2.6 Sick leave

> **Tell HR on your first sick day**
>
> Sick leave has its own year, which HR starts on your first sick day. It is used in order: **Sick Leave 1** (30 days, full pay), then **Sick Leave 2** (60 days, 75% pay), then **Sick Leave 3** (30 days, unpaid). A request that crosses from one stage to the next must be split in two.

2.7 Other requests

Card	Use it to	Steps after you send it
Permission Request	Short permission or time away on one day (from / to time; the hours are counted for you).	Pending → Approved
Remote Work	Work from home on given dates, with a work plan (the working days are counted for you).	Manager → Department Head → Approved
Salary Certificate	An official salary certificate (purpose, addressee, language).	Manager → HR → Issued
Overtime	Pre-approval of overtime hours.	Manager → Department Head → Approved
Training	Professional training (course, provider, cost).	Manager → Department Head → HR → Finance → Approved
Medical Allowance	A child medical allowance claim, with the invoice.	HR Review → HR Director → Finance → Approved
Company Car	A company vehicle.	Manager → Department Head → HR → Finance → Approved
Update My Data	A correction to your personal record (for example address, phone).	Manager acknowledgement → HR verification → IT updated → Completed

For **Permission Request** choose the hour, the minutes and AM / PM for both times; a time without minutes or AM / PM is refused.

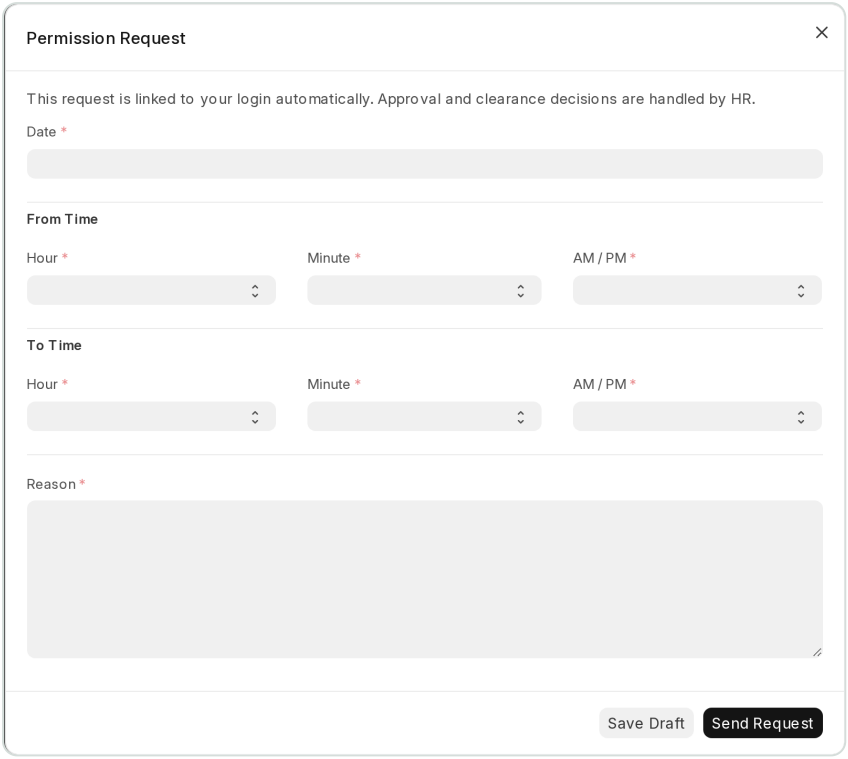

Figure 10. Permission Request with the time pickers.

> **Save Draft or Send**
>
> **Save Draft** keeps the request for later and nobody sees it yet; you can open it again to change, send or delete it (section 2.9). **Send Request** sends it for review. A sent request can no longer be changed by you; if HR rejects it, you can send it again with the corrections.

2.8 Your requests and their status

Click **N request(s)** on a card to see the requests of that type, then click one to open it. **Recent Requests** in the menu lists your latest requests of every type (**View details**). A request shows:

- its number and **status**, and what you entered;
- when it was rejected, the **Rejection reason** HR or your leave approver gave;
- **History**: every step with who moved it and when (for example *Pending Manager*, *Pending Dept Head*, *Approved*).

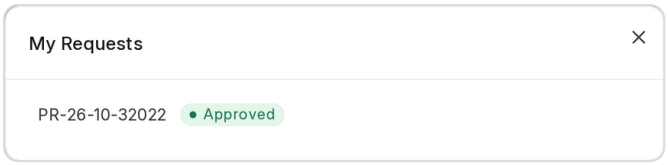

Figure 11. My Requests.

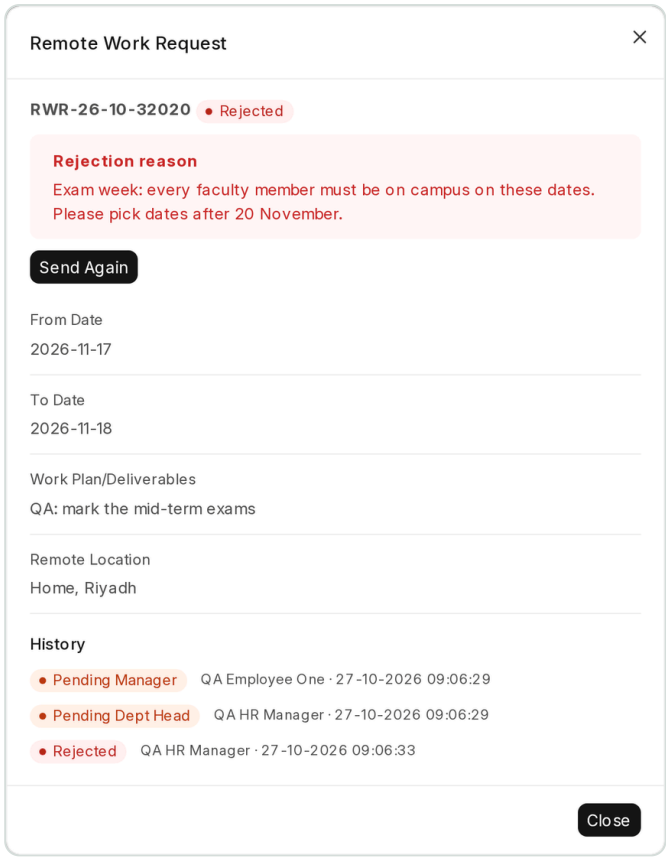

Figure 11a. A rejected request: the reason, Send Again and the history.

2.9 Drafts and sending again

- **A draft**: open it and click **Edit Draft**; the form opens with what you saved. Change it, then **Save Draft** again or **Send Request**. The request keeps its number. **Delete Draft** removes a draft you no longer need.
- **A rejected request**: read the reason, then click **Send Again** (**Apply Again** for leave). A new request opens filled in from the rejected one; correct it and send it. The new request says *Sent again in place of …* and HR sees the rejected one with it. Each rejected request can be sent again once.

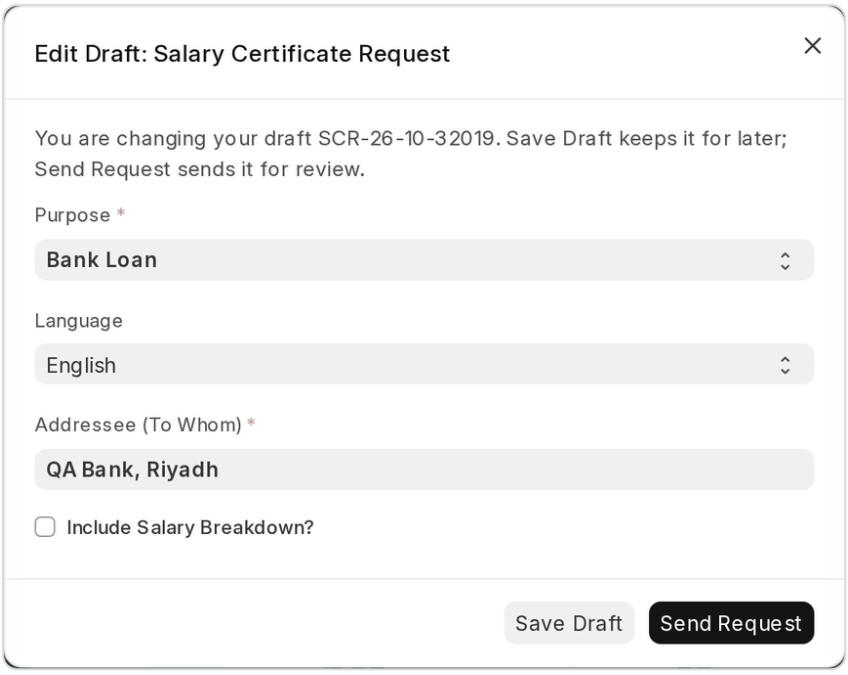

Figure 11b. Edit Draft: the form opens with what you saved.

2.10 Notifications

The **bell** at the top of the portal shows a red dot when something new happened: *Your <request> <number> is now <status>* each time HR moves one of your requests on, approves or rejects it (with the reason). Click the notification to open the request. When the college e-mail is set up, the same message is also e-mailed to you. Leave applications are not in the bell: you get an e-mail when your leave is approved, rejected (with the reason) or cancelled, and its **Open Now** button opens the application on the portal.

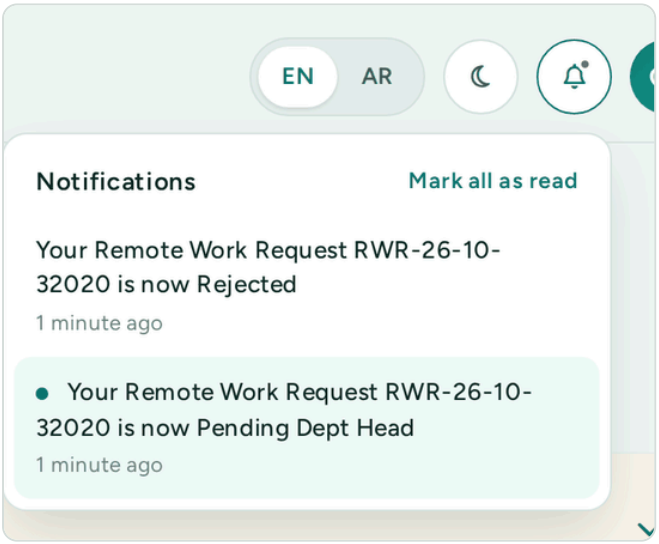

Figure 11c. The bell after a rejection.

> **Your data is private**
>
> You only ever see your own requests, records and files. You cannot approve your own requests or leave, and Contract Renewal is filed by HR.

2.11 Instructors and other staff: My HR on your own dashboard

Instructors, heads of department, deans and the other staff keep their own dashboard after login. When your login is linked to your Employee record, that dashboard shows a **My HR** card under its first row of figures (on the Advisor dashboard, under the heading):

- **My Leave**: your balances (annual leave first) and what to do next, with **Apply now** or **Send Leave Return** when it applies.
- **My Requests**: your four latest requests and their status; **View** opens one, with the reason and the history after a rejection.
- **Apply for Leave**, **New Request** (every service of the Employee Portal) and **Employee Portal** for the full list.

The windows are the same as on the Employee Portal (sections 2.4 to 2.9). If you see no card, your login is not linked to an Employee record yet: ask HR.

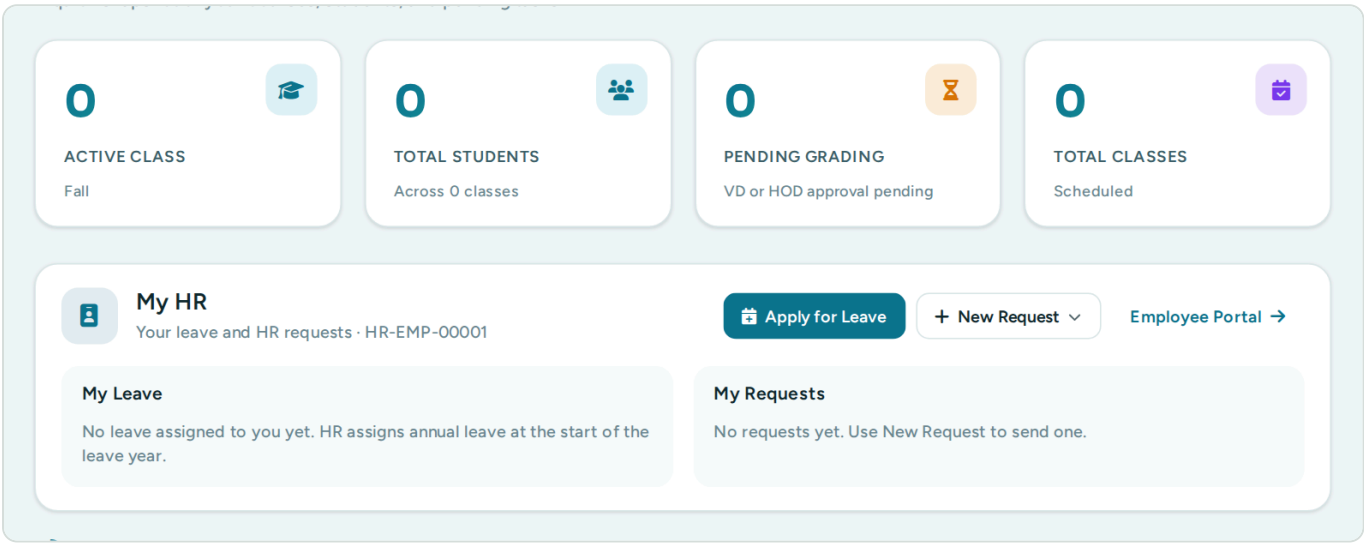

Figure 11d. The My HR card on the Instructor dashboard.

3 HR: the HR Portal

3.1 Dashboard

The HR Portal opens with how many requests wait for review, **Today at a Glance** (employees, pending training, pending allowance, active licences) and one card per request type. The amber figure on a card is how many wait for a decision; **Open** opens the list.

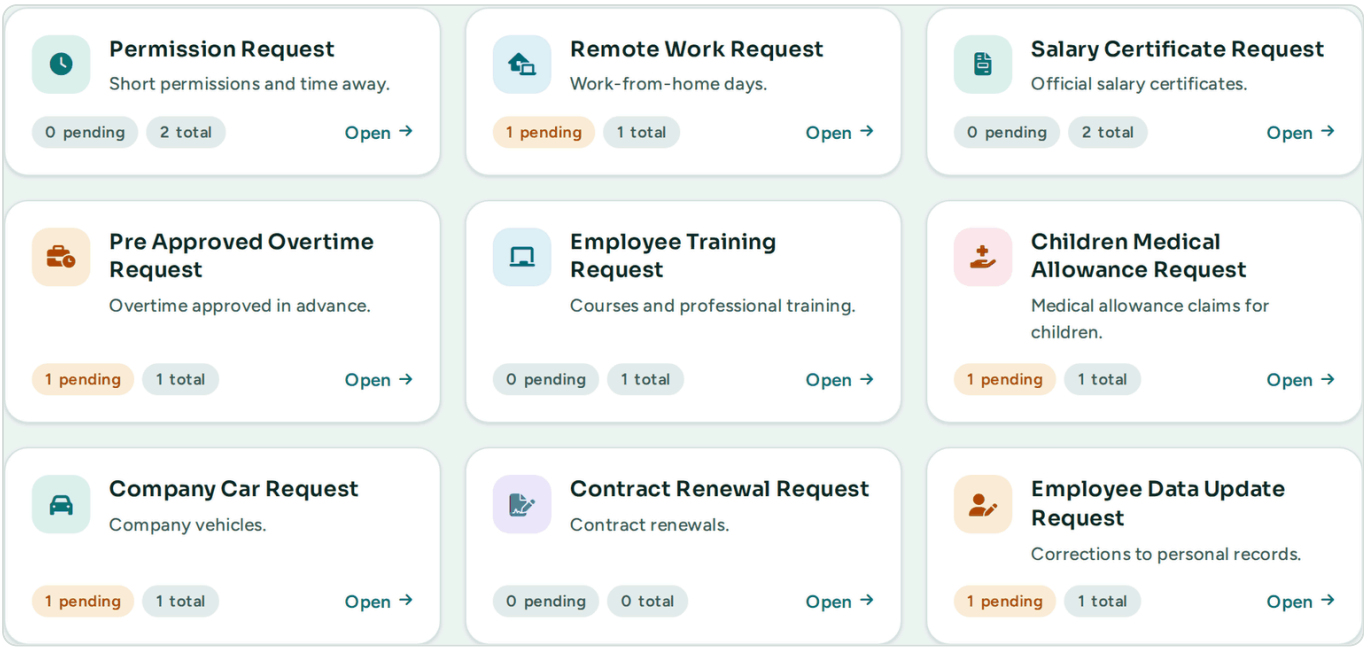

Figure 12. Employee Requests on the HR Portal.

The menu groups everything HR uses: **People** (Employees, Employee Requests, Leave, HR Transactions), **Hiring & Records** (Recruitment, Medical Licenses), **Academic & Ministry** (Academic Presence, Ministry (Jameah)) and **Settings**.

3.2 Processing a request

1. On the HR Portal click **Open** on the request card (or use the menu). Filter the list on *Status* to see what waits.
2. Open the request and check the details and any attachment.
3. Change **Status** to the next step once that person has agreed (for example *Pending Manager* → *Pending Dept Head*), or to *Approved / Issued*, or *Rejected*. To reject, fill **Rejection Reason** (it is required and the employee reads it). Click **Save**.
4. The employee sees the new status on their portal straight away and gets a notification (bell, and e-mail when the college e-mail works).

New requests are announced in the bell of every HR User and HR Manager: *New <request> from <employee> (<number>)*; click it to open the request. A request that an employee **sent again** after a rejection shows **Sent Again From** with a link to the rejected one and its reason. Setting a rejected request back to a pending step clears its reason.

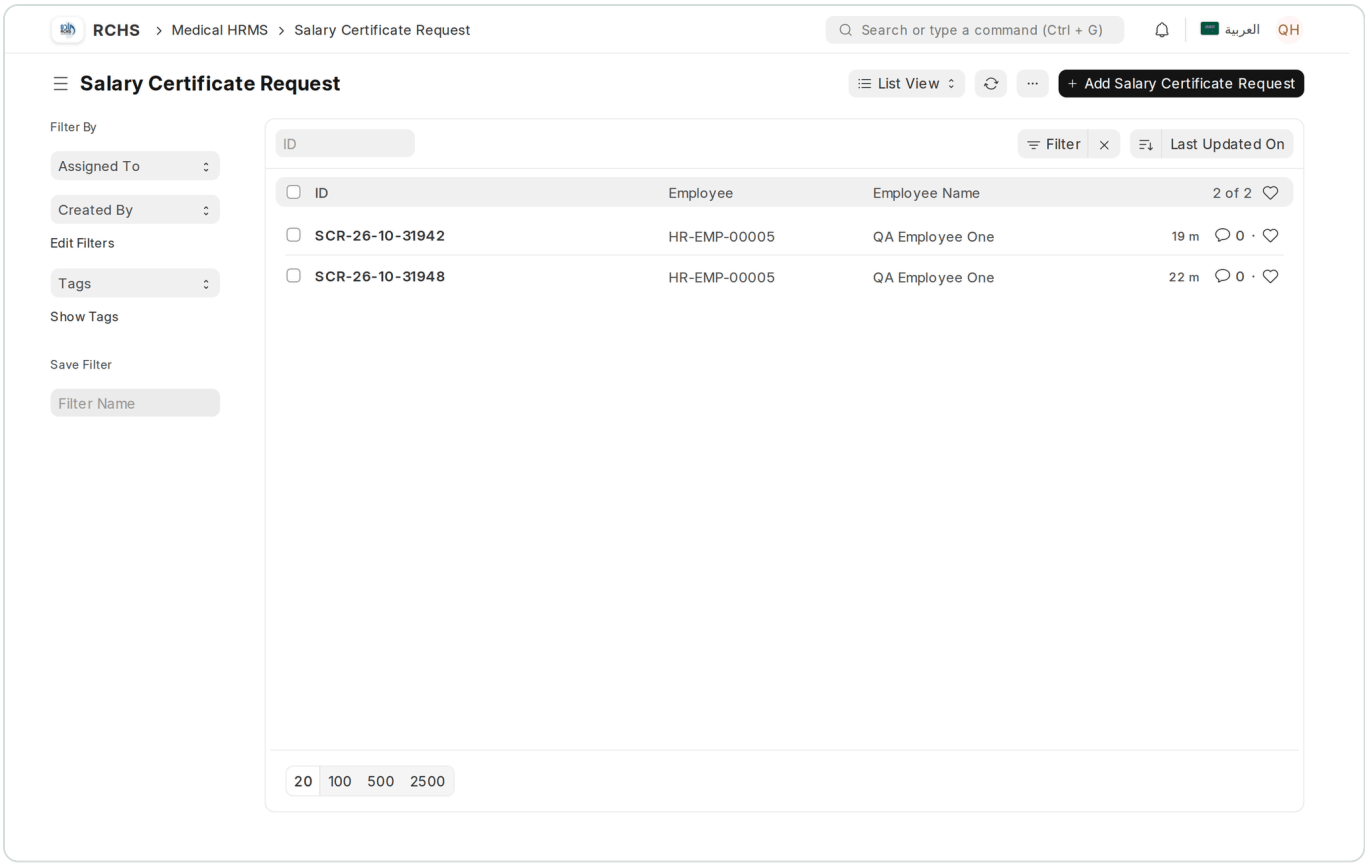

Figure 13. A request list (Salary Certificate Request).

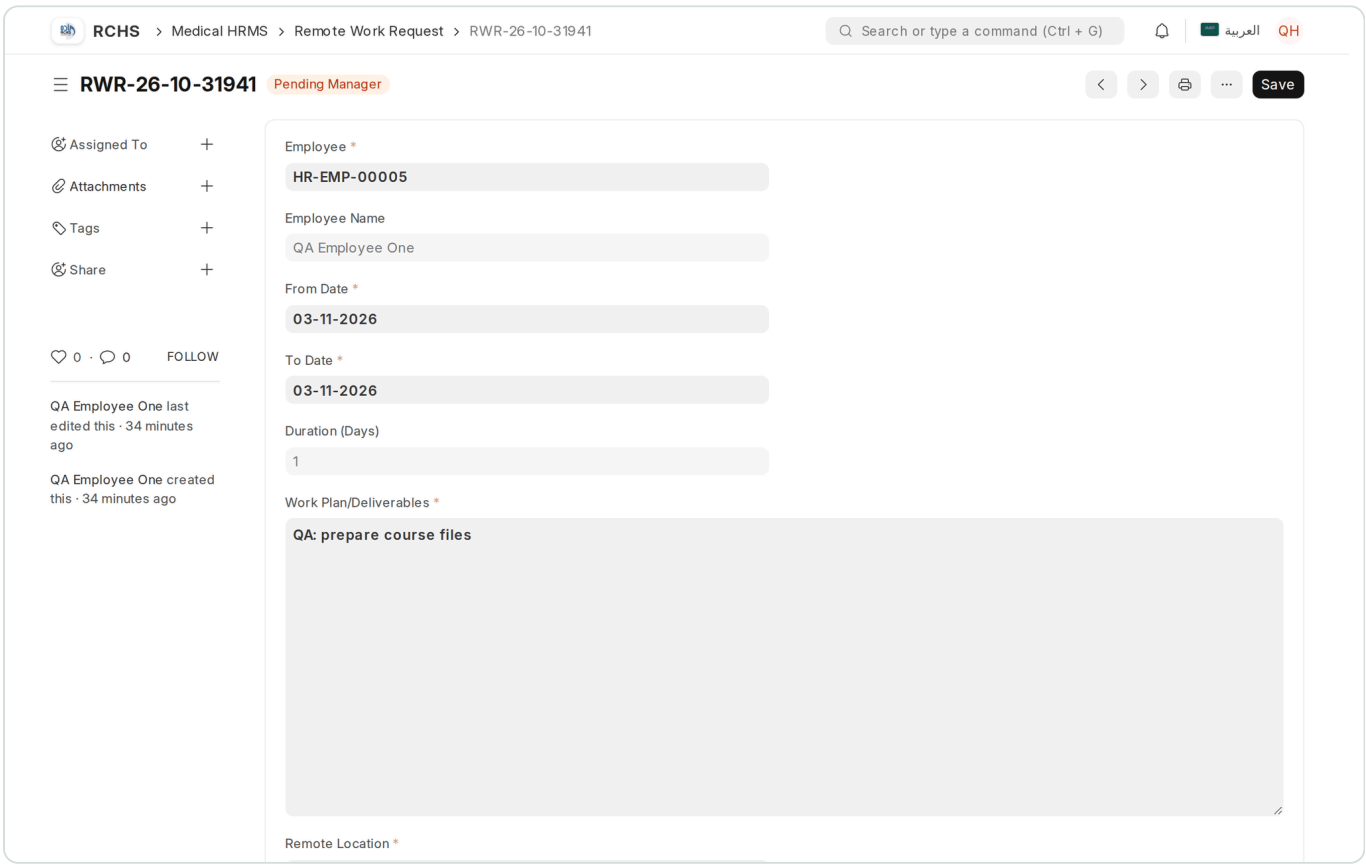

Figure 14. A request form (a Remote Work Request at *Pending Manager*). HR moves the Status from step to step. Duration is counted by the system.

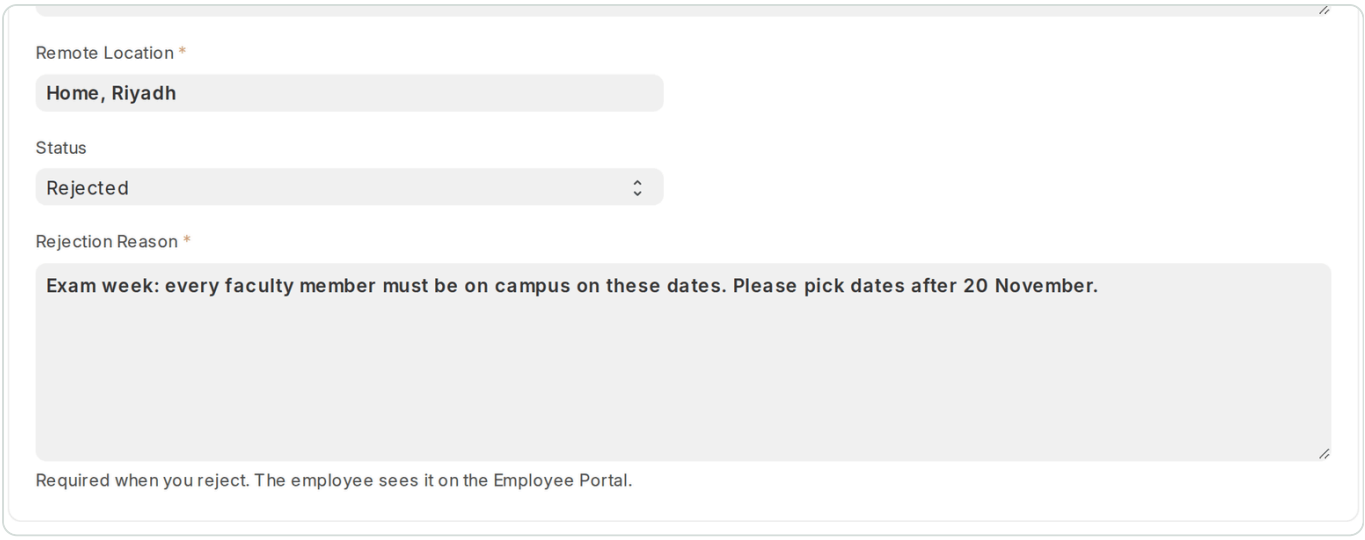

Figure 14a. Rejecting: with Status *Rejected*, Rejection Reason is required.

> **Approval steps today**
>
> HR records each step in the Status after the manager, department head or Finance has agreed. Amount limits are checked when a request is approved (training above 10,000 needs a Department Head, above 30,000 the HR Manager, above 50,000 Finance; expense claims above 5,000 a Department Head, above 20,000 Finance; travel above 15,000 a Department Head, above 50,000 Finance; company cars always Finance).

3.3 Request steps

Request	Status steps
Permission Request	Draft → Pending → Approved / Rejected
Remote Work, Overtime	Draft → Pending Manager → Pending Dept Head → Approved / Rejected
Leave Plan	Draft → Pending Manager → Pending Dept Head → Approved / Rejected
Salary Certificate	Draft → Pending Manager → Pending HR → Issued / Rejected
Training, Company Car	Draft → Pending Manager → Pending Dept Head → Pending HR → Pending Finance → Approved / Rejected
Children Medical Allowance	Draft → Pending HR Review → Pending HR Director → Pending Finance → Approved / Rejected
Contract Renewal (HR files it)	Draft → Pending Manager → Pending Dept Head → Pending HR → Pending VP → Approved / Rejected
Employee Data Update	Draft → Pending Manager Acknowledgment → Pending HR Verification → IT Updated → Completed
Leave Return	Draft → Pending HR Review → Pending Manager Readiness → (after sick leave only) Pending Occupational Health → Completed
Medical Licence	Active / Expired / Suspended / Revoked

4 HR: leave

4.1 Leave applications

The employee's **leave approver** (or HR) decides each application:

1. Open the Leave Application (HR Portal → Leave → **Leave applications waiting**).
2. Set **Status** to *Approved* or *Rejected* (with a **Rejection Reason**, which the employee sees) and click **Save**.
3. Click **Submit** and confirm. Only a submitted, approved leave is taken from the balance. After a rejection the employee can **Apply Again** with other dates.

When the college e-mail works, the leave approver gets an e-mail when an employee applies (*New Leave Application from <employee> (<number>)*), and the employee gets one when the application is approved, rejected (with the reason) or cancelled.

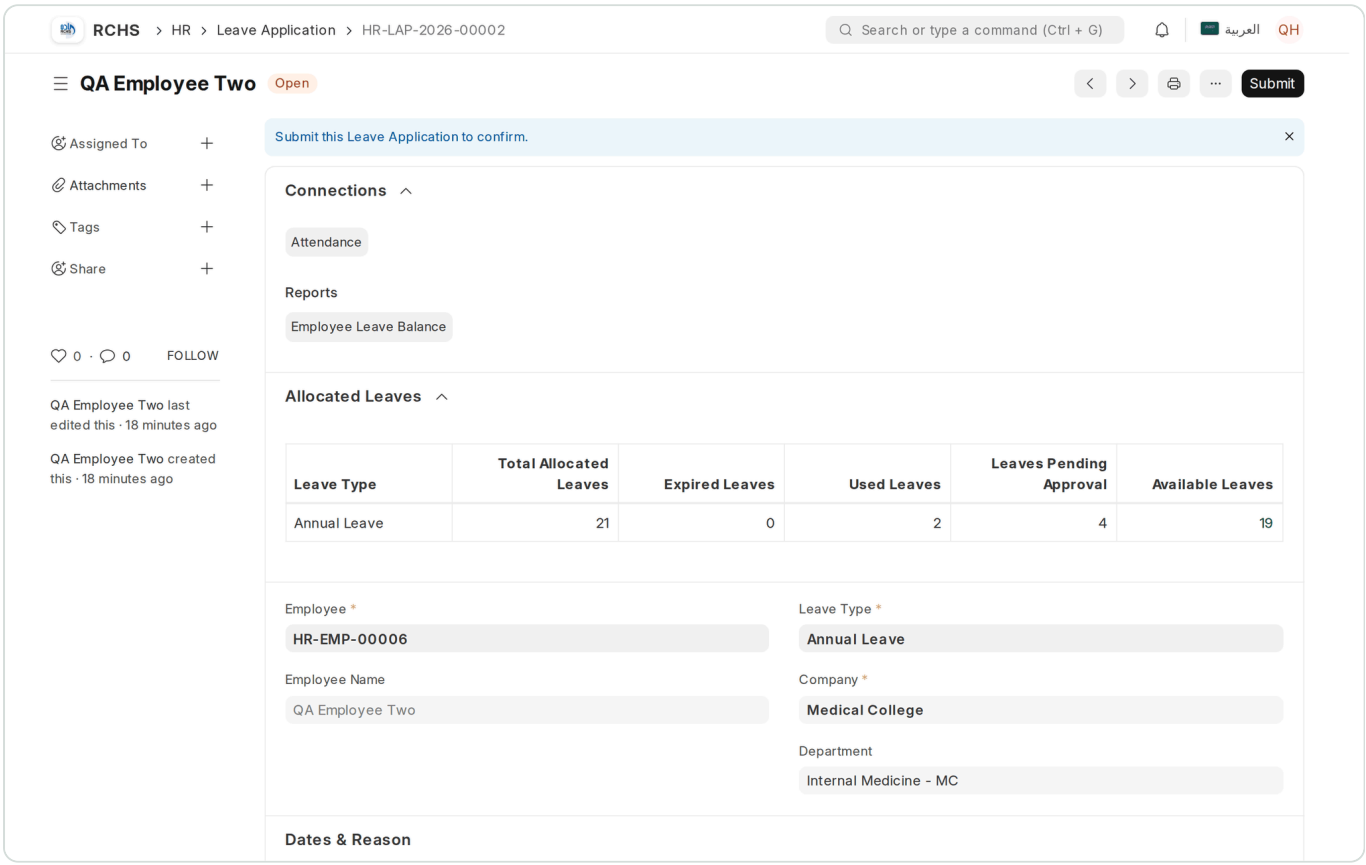

Figure 15. A Leave Application waiting for the approver.

4.2 Leave plans

Move the **Status** from *Pending Manager* to *Pending Dept Head* to *Approved* (or *Rejected*) and save. An approved plan says that the employee applies from the Employee Portal (**Apply now**); once they do, **Applied As** links the leave application, and **Open Leave Application** opens it.

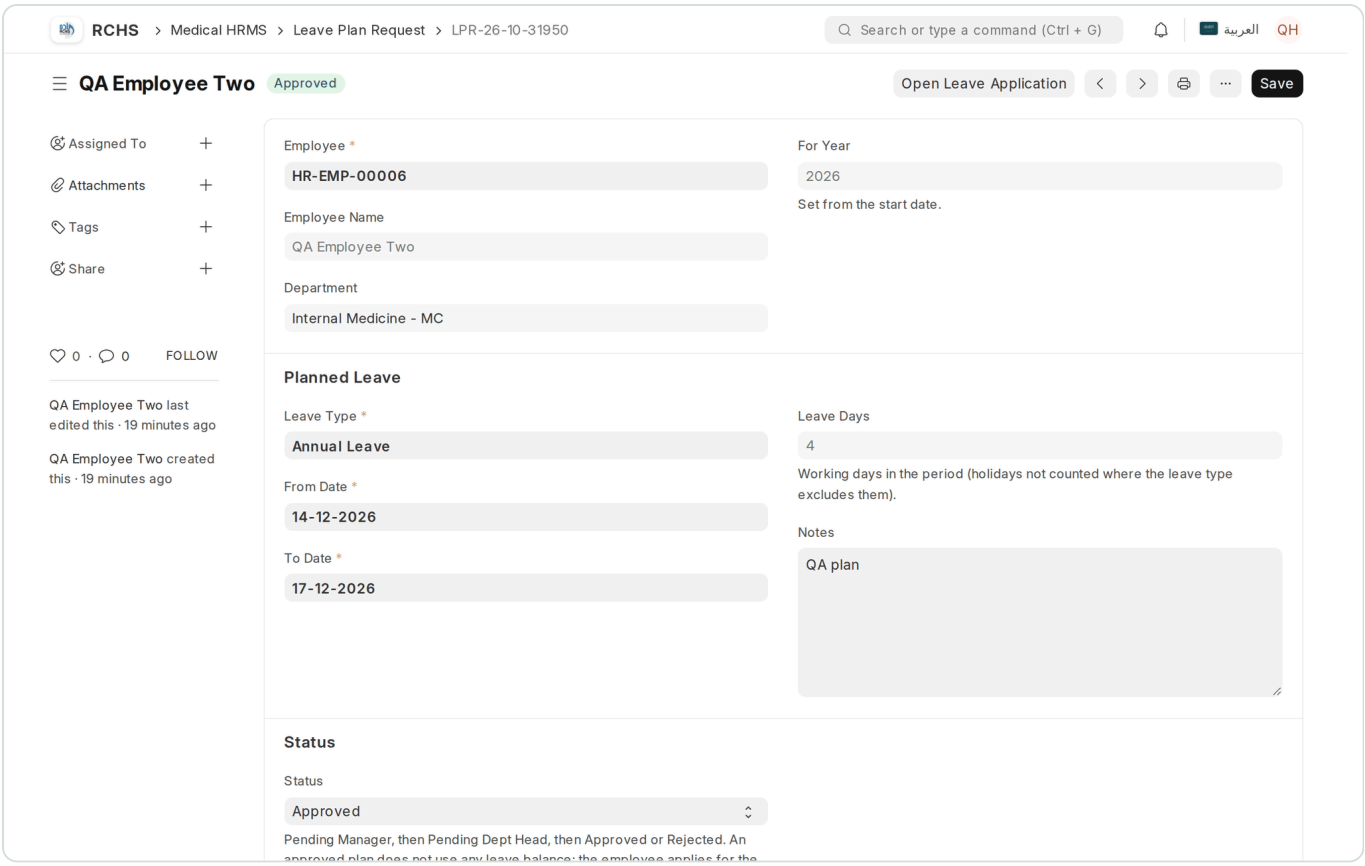

Figure 16. A Leave Plan Request. Leave Days counts working days.

4.3 Leave returns

1. *Pending HR Review*: check the return date. **Days Late** is counted from **Expected Back On** (the day after the leave).
2. *Pending Manager Readiness*: the manager confirms the employee is back at work.
3. After **sick leave only**: *Pending Occupational Health*. Check the fitness certificate and record the **Occupational Health Clearance** (Cleared for Full Duty, Cleared for Modified Duty or Not Cleared).
4. *Completed*. After sick leave this needs a clearance "Cleared for Full Duty" or "Cleared for Modified Duty".

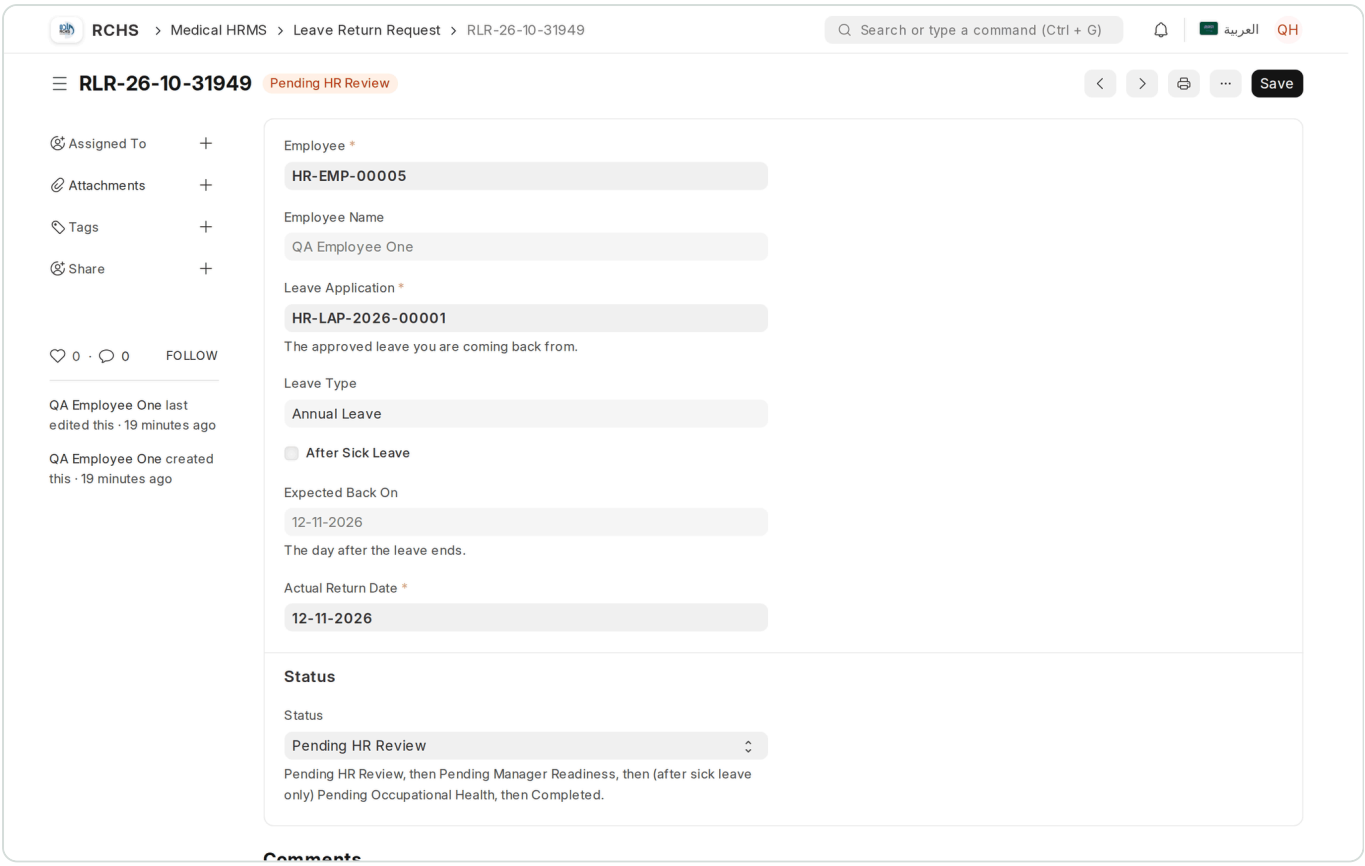

Figure 17. A Leave Return Request (after annual leave: no fitness clearance section).

4.4 Leave section and yearly setup

HR Portal → **Leave** has three parts:

- **Leave setup check** per company: active leave period, holiday list, leave approvers and annual leave for every employee. Orange lines have a **Fix** link.
- **Daily leave work**: applications waiting, plans waiting, returns to complete and who is on leave today. Each count opens its list.
- **Yearly setup, in this order**: Leave Period, Holiday List, Leave Policy, Leave Control Panel, Leave Approvers, Monthly Limits. Do this at the start of every leave year (details in the Installation and Setup Guide, section 6.3).

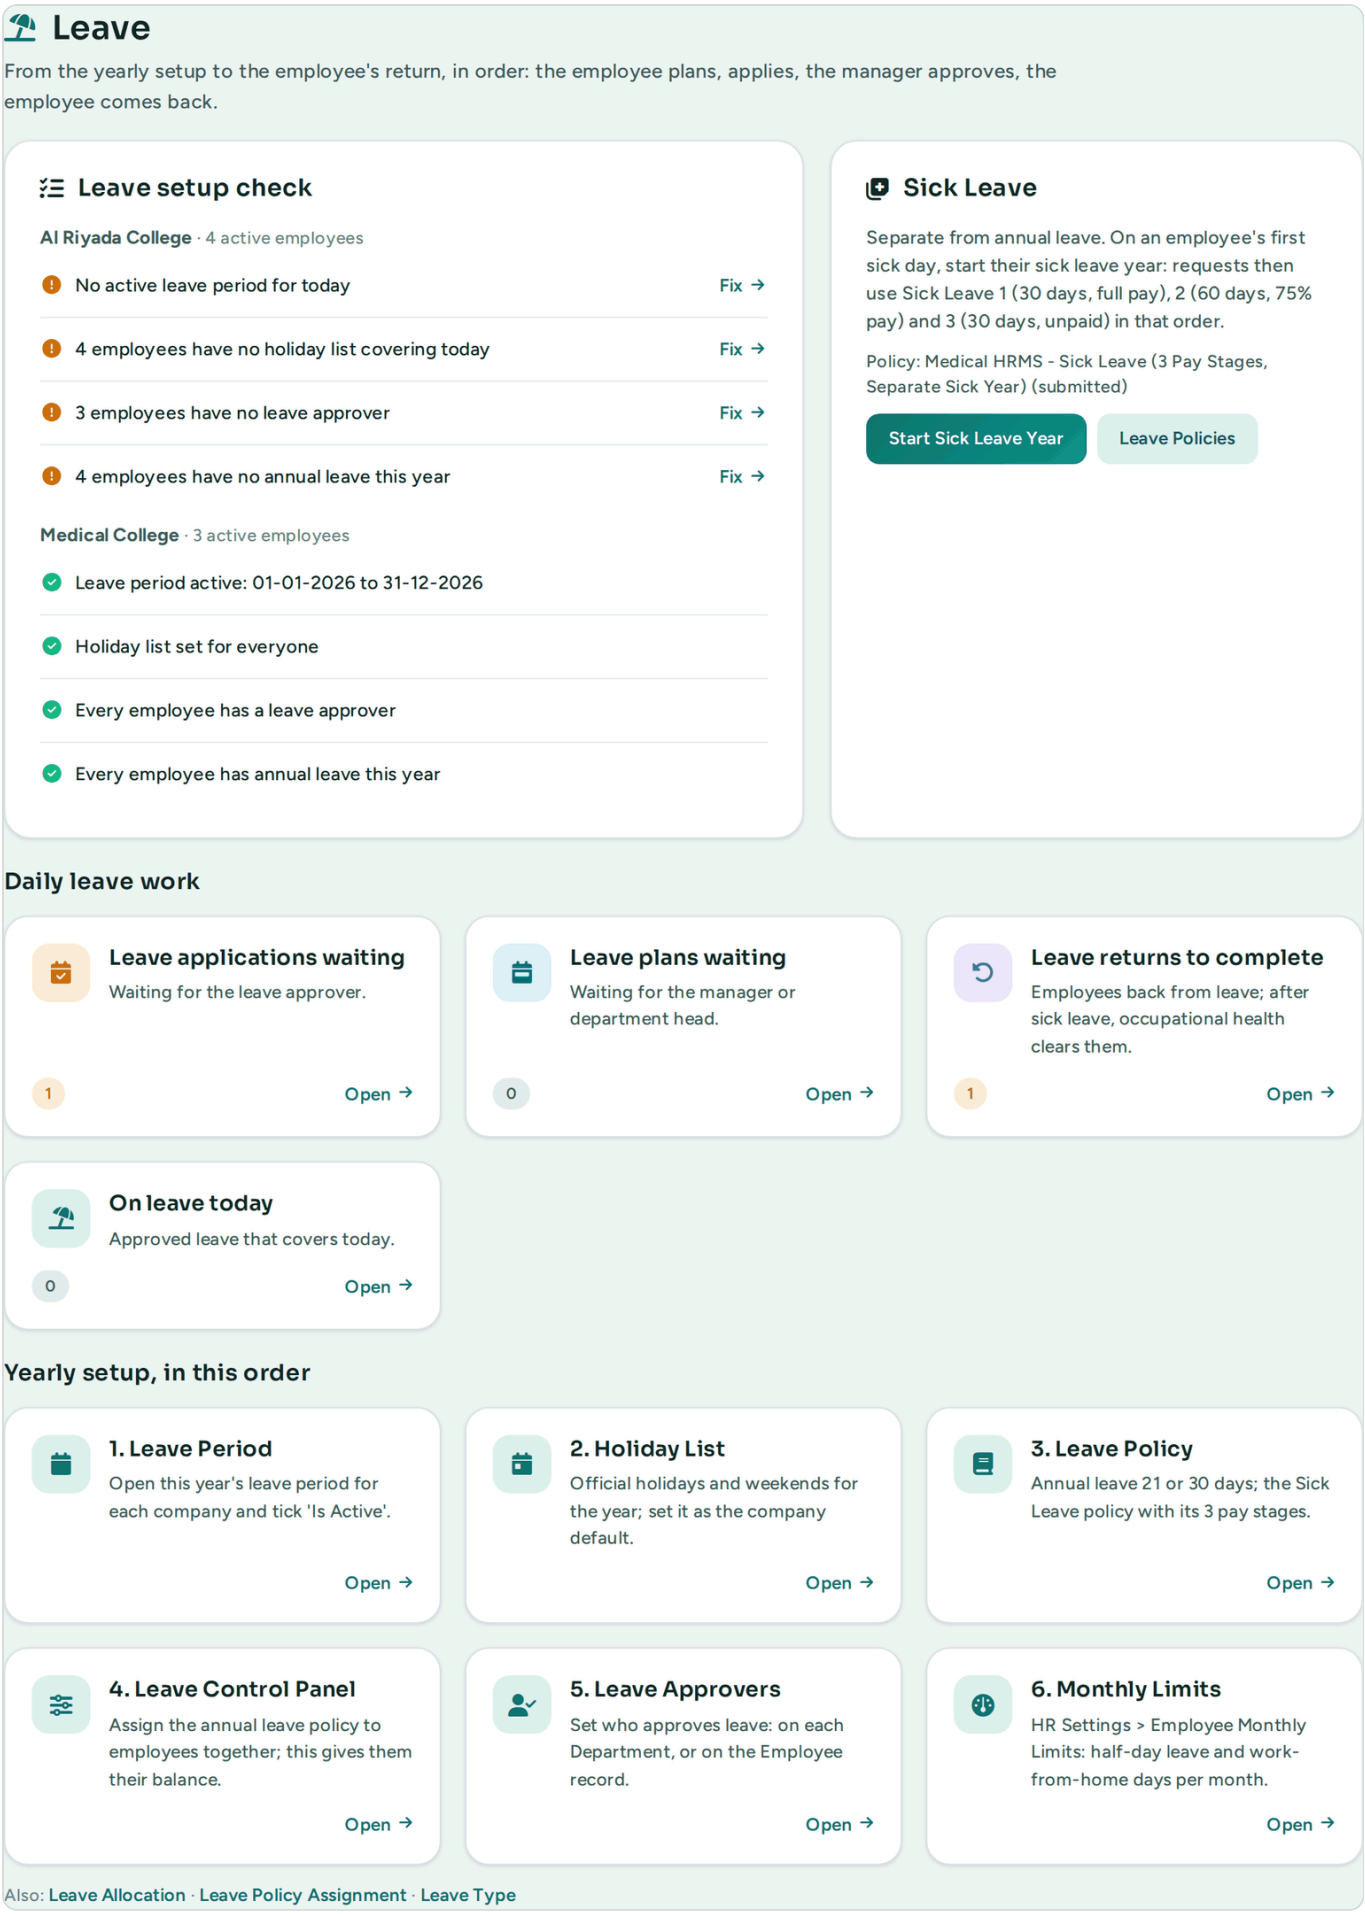

Figure 18. HR Portal → Leave.

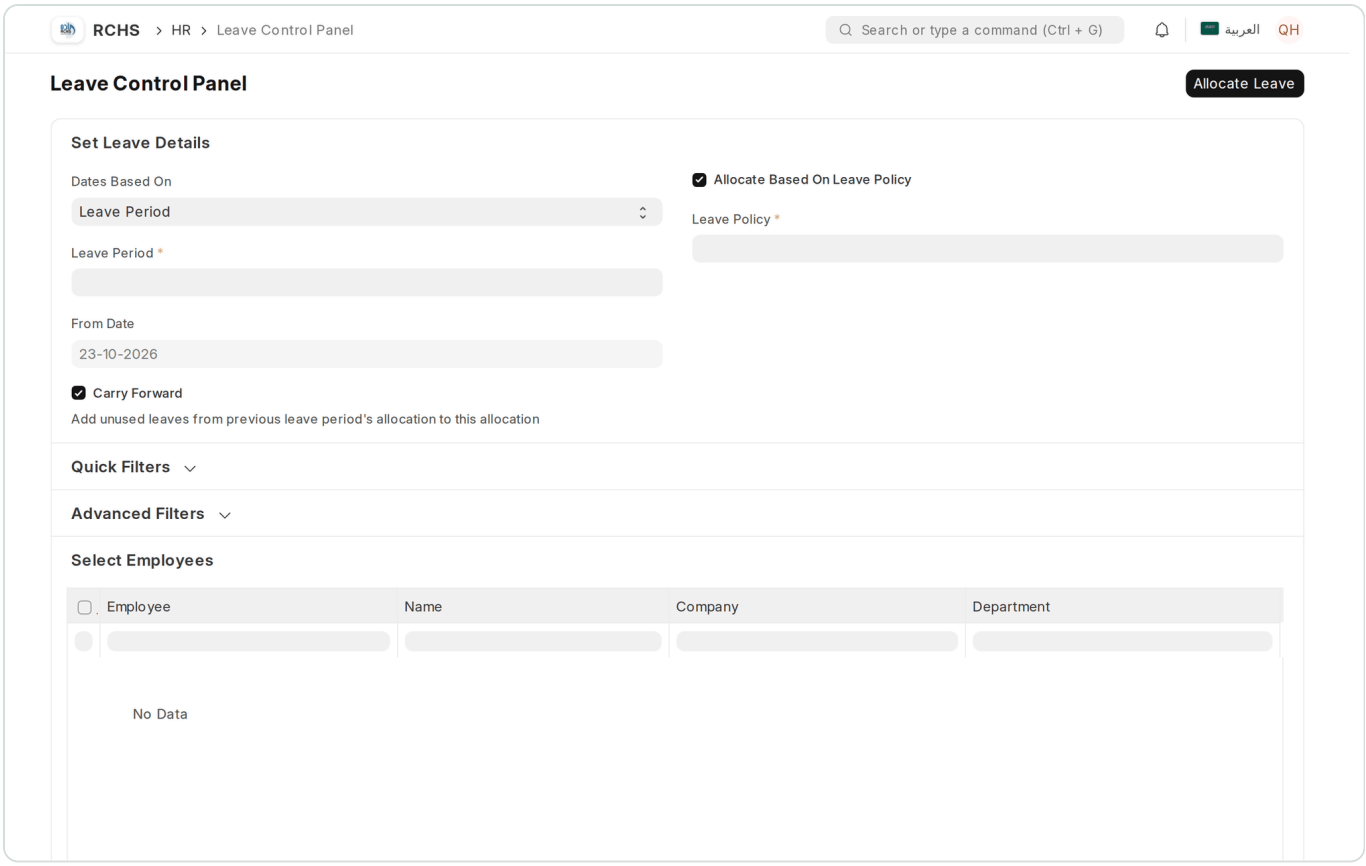

Figure 19. Leave Control Panel: assign the annual leave policy to many employees at once.

4.5 Starting a sick leave year

HR Manager only. When an employee reports their first sick day: HR Portal → Leave → **Start Sick Leave Year**, choose the employee and the **First Sick Day**, confirm. The employee then has Sick Leave 1 and 2 for one year from that day; annual leave is not touched.

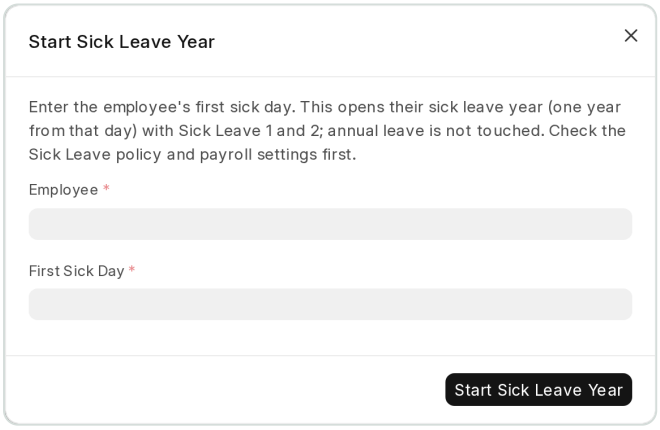

Figure 20. Start Sick Leave Year.

5 HR: recruitment

Application link → applicant fills the form → HR reviews → Accept → Create Employee

5.1 Create an application link

1. HR Portal → Recruitment → **Job Application Link** → **+ Add**.
2. Choose the **Application Category** (Academic Staff, or Non-Academic / Other Staff), the **Role** to hire for (only hireable roles are offered) and the dates it is valid. Save.
3. Click **Generate Link** and send the link to the applicant. Each link only works within its dates.

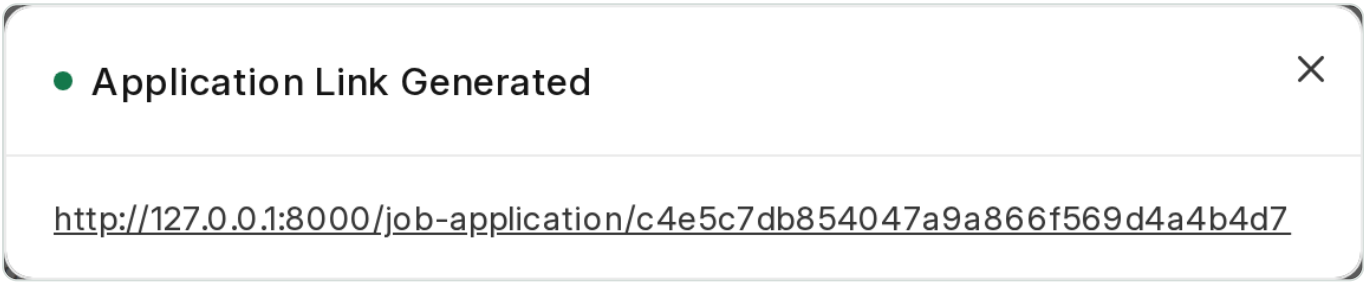

Figure 21. The generated application link (here from the test site; on the live server it starts with the college system's own address).

5.2 What the applicant does

The applicant opens the link (no login needed) and fills the form step by step, with **Next** and **Back**. The progress is saved on their device.

- Names in English use English letters only; names in Arabic use Arabic letters only.
- **Identity Type** and **Identity Number** are required, following the Ministry rules (national ID 10 digits starting with 1 for Saudis, Iqama 10 digits starting with 2).
- Phone numbers have a country code picker (Saudi Arabia first).
- Academic applicants add their qualifications and academic experience.
- On the last step they review everything, tick the confirmation and click **Submit Application**. They get a reference number and can download a PDF receipt.

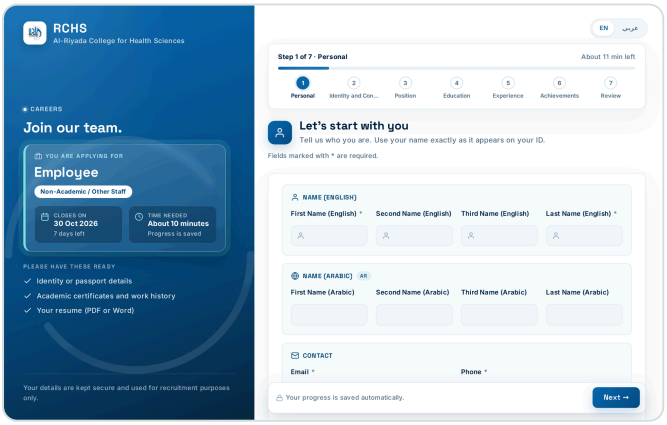

Figure 22. The application form, first step.

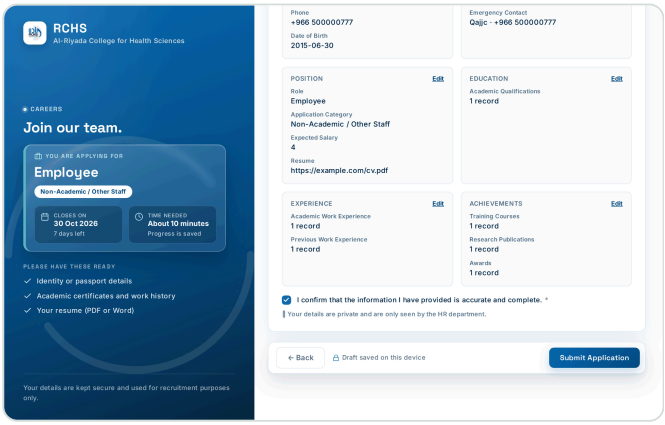

Figure 23. The review step before sending.

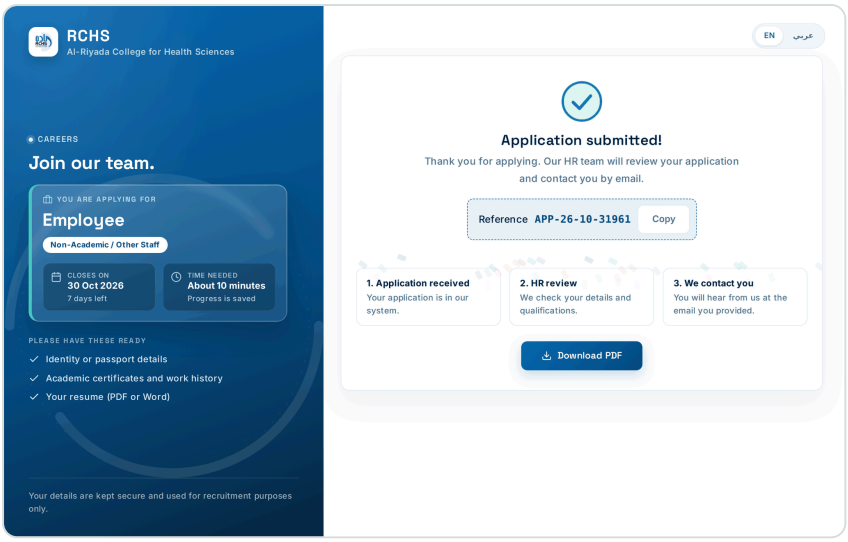

Figure 24. Application sent: reference number and receipt.

5.3 Review and hire

1. HR Portal → Recruitment → **Employee Job Applicant**. Open an application (*Pending*) and review it.
2. Click **Accept** (or **Reject**).
3. Click **Create Employee**. The dialog asks for what the Employee record needs and the form did not ask: Academic Department, City, Geographical Work Location, Job Rank (and Gender / Date of Birth if missing), the Education Department for academic records, and the e-mail to use.
4. For academic hires use the official college e-mail (`@alriyada.edu.sa`) as Company Email; a personal e-mail is refused before anything is created.
5. Click **Create Employee**. The system creates the Employee, the login, and for academic roles the Instructor, Academic Advisor or Head of Department record. The applicant's answers and qualifications are copied over.

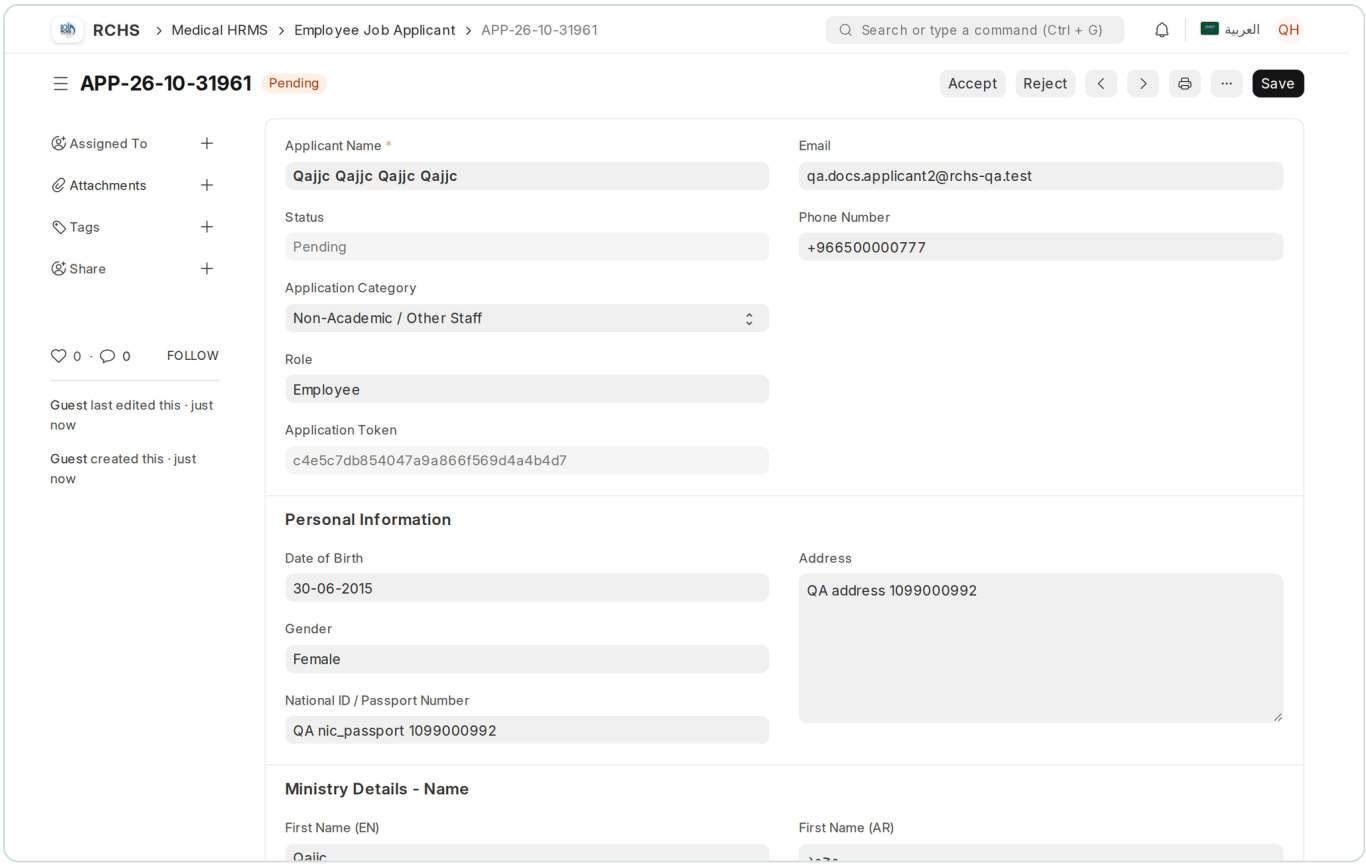

Figure 25. Employee Job Applicant with Accept / Reject.

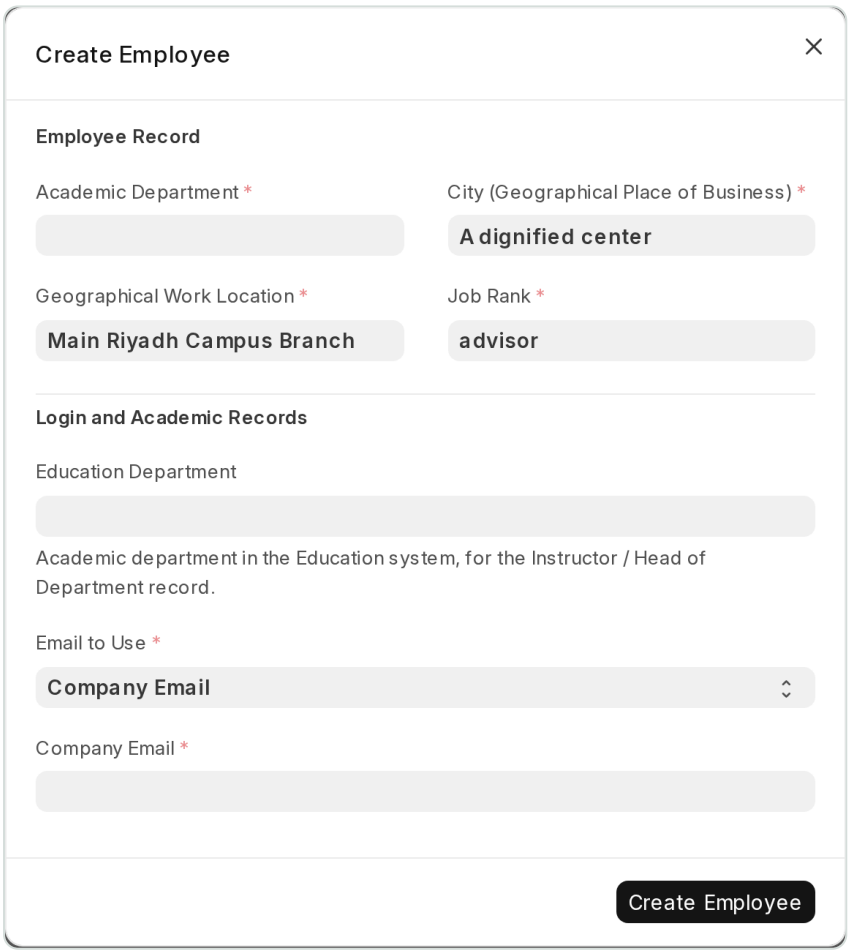

Figure 26. Create Employee.

6 HR: employee records and Ministry data

The **Employee** form has the Ministry (Jameah) fields: names in Arabic and English, identity, nationality, work city, job rank, qualifications, experience, certificates and awards. Most are Ministry lists; pick a value from the list.

- The Ministry identity rules are checked on save (national ID / Iqama format, no duplicate identity number).
- **View → Ministry (Jameah) Data** on the Employee form shows exactly what is sent to the Ministry for that employee.
- Teaching staff (with an Instructor record) are sent as Faculty, not as Employees.
- On an **Instructor** or **Academic Advisor** form, picking the person's Employee fills in the matching Gender (and the Department, when it is in the academic list); the form saves normally.

Employees Missing Ministry Data (HR Manager)

HR Portal → Ministry (Jameah) → **Employees Missing Ministry Data** lists each employee with the Ministry-mandatory values still empty, named as on the Employee form. To complete many at once:

1. **Download Data Sheet**: Excel with the current values; red cells are mandatory and empty; Ministry lists are dropdowns.
2. Fill in the sheet. Do not change the grey columns.
3. **Check / Import Data Sheet → Check (nothing is saved)**: read the result sheet.
4. When it is clean: **Import**.

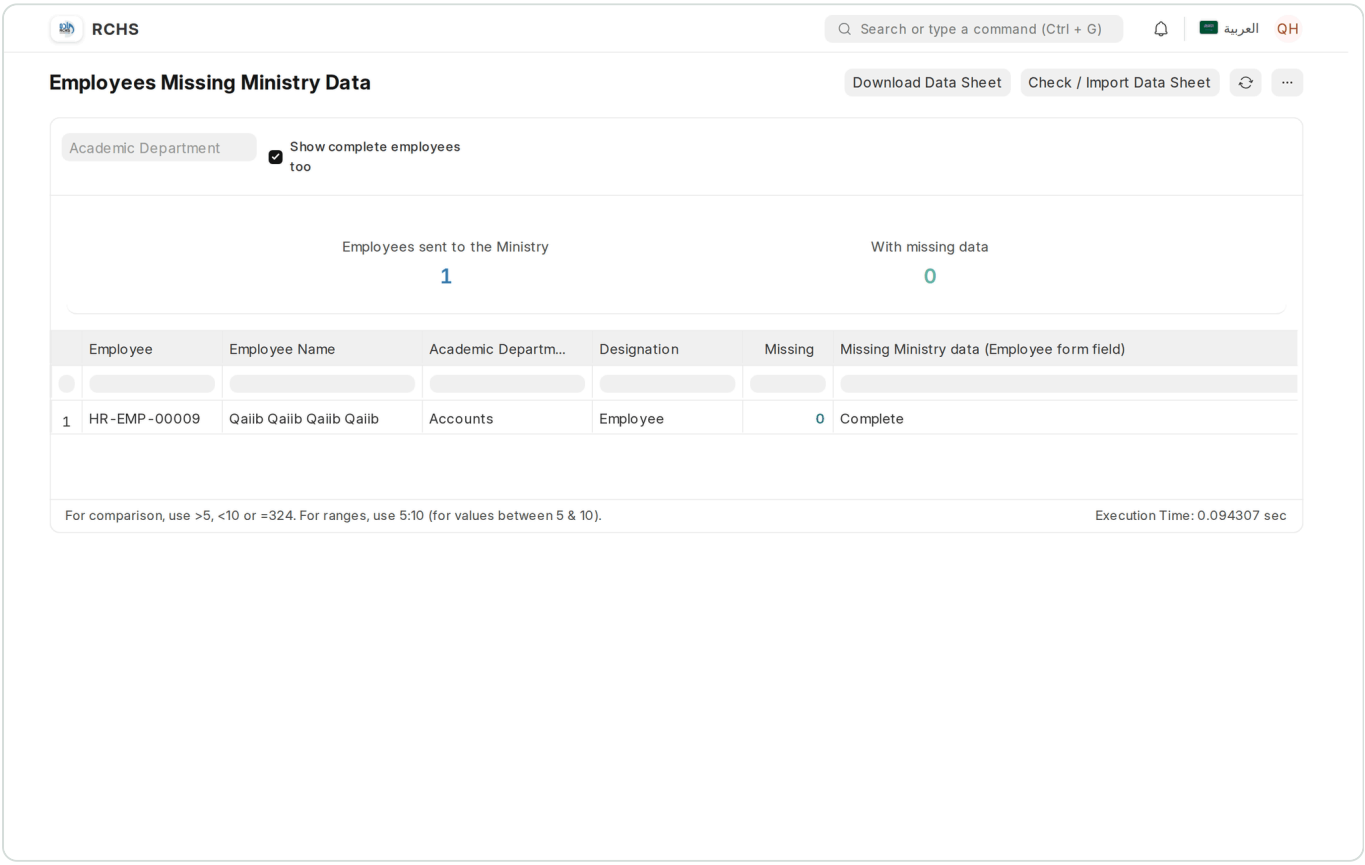

Figure 27. Employees Missing Ministry Data.

7 HR: academic presence

HR Portal → **Academic Presence** answers four questions from the published class timetables, exam committees and recorded attendance:

Tab	Shows
Faculty Schedules	Every teaching session by faculty member, room and mode, for the dates chosen.
Proctor Schedules	Exam proctoring duties by date, time and room, from the exam committees. Empty until the exam committees and their proctors are entered.
Students on Campus	For one day: students expected, present and absent in each hour (7:00 to 22:00), from the class lists and the attendance teachers record.
Faculty After 4 PM	For each day, faculty on campus after the cut-off time (HR Settings, 4:00 PM unless changed), teaching or proctoring, with where the record comes from. Until attendance devices are connected, the times come from the timetable and class attendance.

Refresh reloads the figures; **Export (Excel CSV)** downloads the current tab. When HR has set an Academic Holiday List (HR Settings), its days are left out.

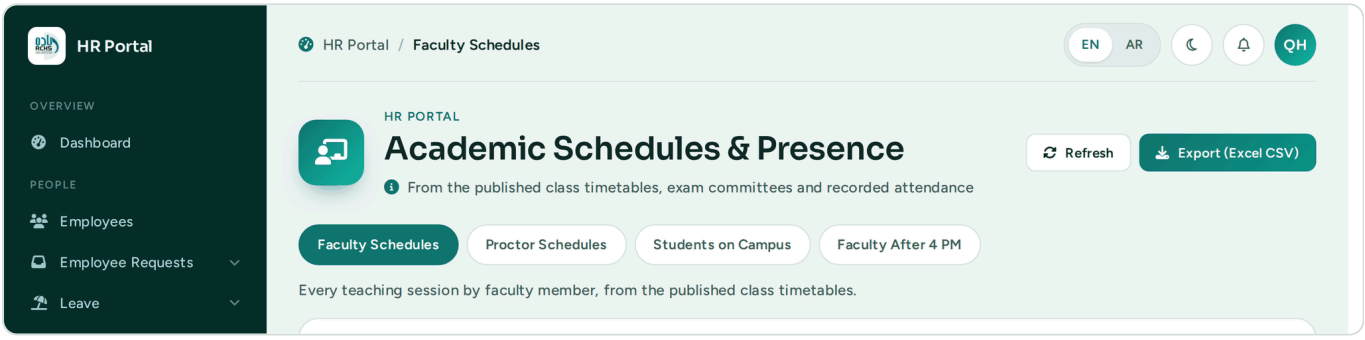

Figure 28. Academic Schedules & Presence.

8 Ministry (Jameah) pages

For HR and Academic Affairs (Education Manager role). The Ministry's Jameah agent reads the college data from 23 views; these pages show what is sent and what is missing.

- **Jameah Data Check**: invalid codes (must be 0), values waiting for a Ministry code, settings not filled, mandatory columns with gaps, and problems in the source records. **Refresh Academic Figures** updates GPA and credit hours now (they also refresh every hour).
- **Code Map**: links college values to official Ministry codes. Open a row *Needs Review*, pick the code, set *Verified*.
- **Jameah Settings**: institution values (college code, study location city, study types, programme duration). Empty settings are sent empty.

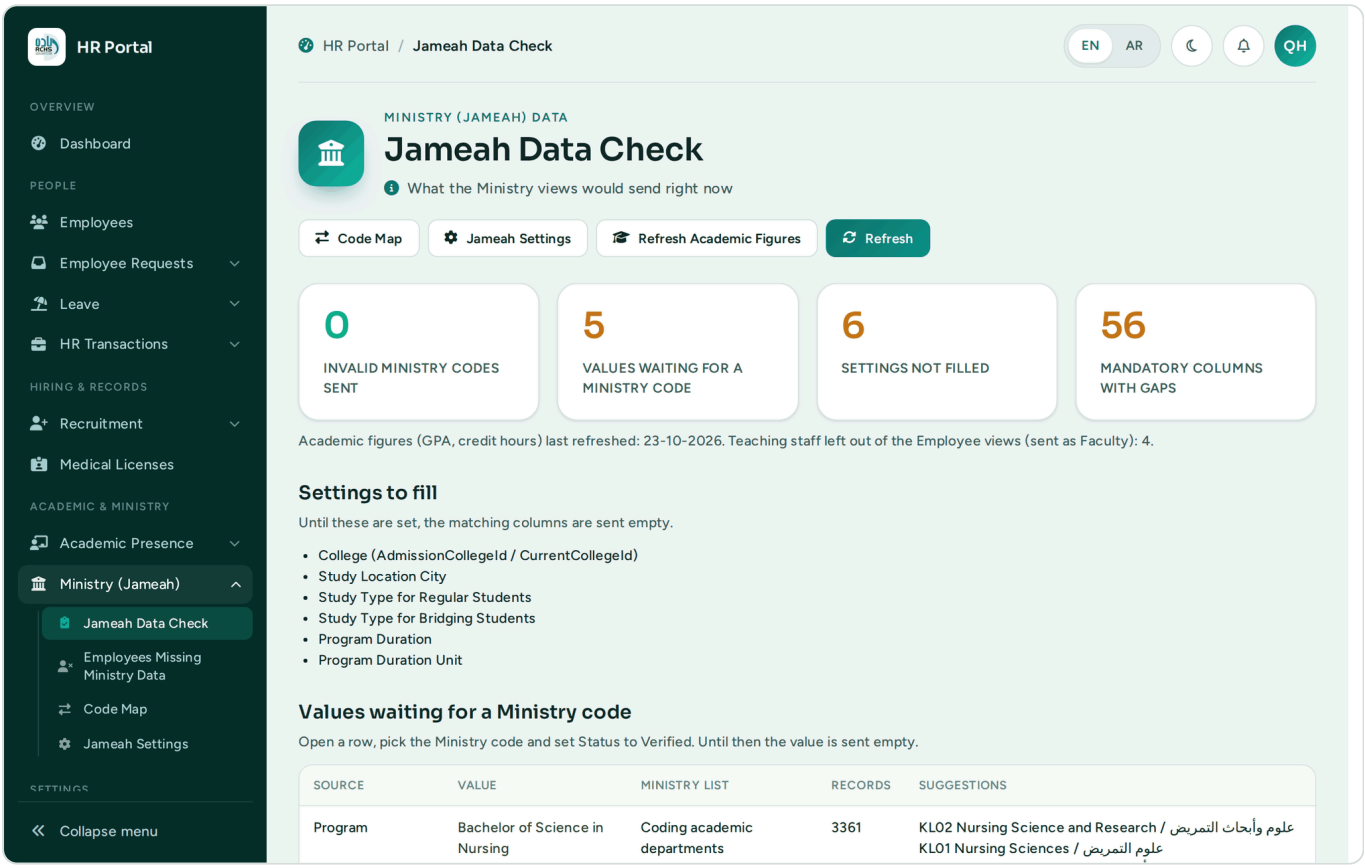

Figure 29. Jameah Data Check.

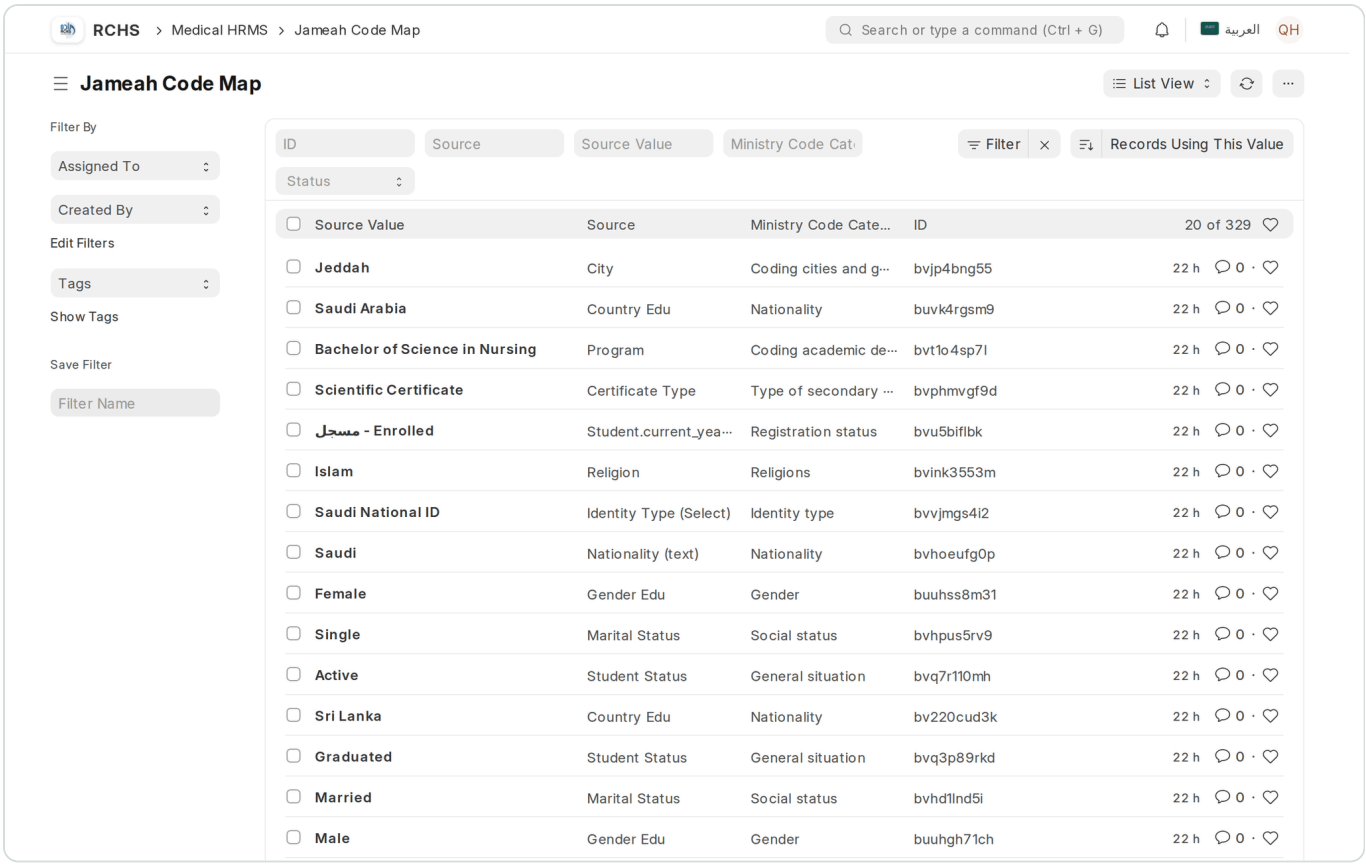

Figure 30. Jameah Code Map.

9 Managers and approvers

- **Leave approvers** open the employee's Leave Application, set *Approved* or *Rejected* (a rejection needs a reason), save and submit (section 4.1). Who approves whom is set on the Department or the Employee record.
- **Managers and department heads** agree requests and leave plans; HR records each step in the request's Status (sections 3.2 and 4.2).
- **Department Heads** and **Finance** approve amounts above their limits (section 3.2).
- After an employee's return, the manager confirms readiness (*Pending Manager Readiness*, section 4.3).

> **You only see what your role allows**
>
> Approvers see the requests they act on; employees never see each other's requests or files.

10 Testing the system

For the testing team and HR during user acceptance testing (UAT). Always test on the test site, never on the live server.

10.1 What you need

- The **Test Cases** workbook (`project_tracking/Medical_HRMS_Jameah_Test_Cases.xlsx`): every case with its steps and expected result.
- Test logins for each role. The **Test Accounts** sheet in the workbook lists which roles you need; ask the developer for the logins.
- A browser (Chrome, Edge or Firefox) and, for phone checks, a phone or a narrow browser window.

10.2 How to run a test case

1. Pick a case (filter on Module or Priority; do **Critical** and **High** first).
2. Log in with the role in *Login / role*, check the *Preconditions*, follow the *Steps* with the *Test data*.
3. Compare with the *Expected result*. Set **Result** to Pass, Fail, Blocked or N/A, and fill *Tested by*, *Test date* and *Actual result / notes*.
4. For a Fail, add a row in the **Bug Report** sheet and put its Bug ID in the test case.

The column **Last automated run** shows the developer's own result for the same check. Test the case anyway: something can pass there and still fail for you.

10.3 Reporting a bug

In the Bug Report sheet, one row per bug:

Column	What to write
Date & time seen	When it happened (the developer finds it in the Error Log by this time).
Login (user), Role	Who was logged in.
Page address (URL)	Copy it from the browser's address bar.
What you were doing (steps)	The steps to make it happen again.
Exact error message	Copy the text of the red message or pop-up.
Screenshot file name	Take a screenshot and name it after the Bug ID.
Severity, TC ID	How bad it is (Critical, High, Medium, Low) and the test case.

10.4 A quick check per role

Role	Check at least
Employee	Lands on the Employee Portal; sends a Permission Request and a Leave Application; sees only their own requests; sends a Leave Return after a leave.
Leave approver	Approves and submits a leave; the employee's balance goes down.

Role	Check at least
HR officer	Lands on the HR Portal; every link opens; processes one request of each type; completes a leave return.
HR Manager	Starts a sick leave year; creates an application link, hires a test applicant; downloads and checks the staff data sheet.
Academic Affairs	Opens Jameah Data Check, Code Map and Jameah Settings.
Everyone	Switches to Arabic; uses the system on a phone; no red error anywhere.

11 Questions and answers

Question	Answer
"No leave to apply for yet" when I open Leave Application.	HR has not assigned your annual leave for this year yet. Ask HR; they check the Leave setup check.
My leave type is not in the list.	Only leave you hold is listed. Sick leave appears once HR starts your sick leave year.
I sent a request with a mistake.	A sent request cannot be changed by you. Ask HR to reject it (with the reason), then click **Send Again** on it and correct it (section 2.9).
Why was my request rejected?	Open it: the reason is under the status, and History shows who rejected it and when.
I am an instructor (or head of department) and see no My HR card.	Your login is not linked to an Employee record yet. HR links it; then the card appears on your dashboard (section 2.11).
I did not get an e-mail about my request.	Check the bell at the top of the portal. E-mails are sent only when the college e-mail account works on the server.
The number of leave days is lower than the calendar days.	Weekends and holidays in the holiday list are not counted.
The application link says it is not valid.	The link has expired or was switched off. Ask HR for a new link.
"College E-mail Needed" when creating an employee.	Academic hires need their `@alriyada.edu.sa` e-mail as Company Email.
A Ministry column is empty for an employee.	Use **View → Ministry (Jameah) Data** on the Employee, the Employees Missing Ministry Data report, or Jameah Data Check.
Pages are slow for a few minutes.	The Ministry academic figures refresh every hour; wait a few minutes.
I see a red error.	Take a screenshot, note the time and the page address, and report it (section 10.3).
