AL-RIYADA COLLEGE FOR HEALTH SCIENCES · MEDICAL HRMS

Round 3: What's New and How to Test

Only what changed in this round: instructors, heads of department and the other staff keep their own dashboard, and a **My HR** card on it gives them their leave and HR requests. The full User Guide stays the reference for everything else.

FOR	The testing team (and HR, to see what is new).
TEST CASES	10 cases: in the Test Cases workbook, filter the **Round** column on **Round 3**. They are listed in section 5.
VERSION	27 October 2026 · branch `develop`
BUILT BY	Abdul Hakeem (Medical HRMS and Jameah lead)
SEE ALSO	Round 2 document · User Guide (updated for Round 3) · Installation and Setup Guide

1 What is new

Change	Who sees it	Tracker	Test cases
A My HR card on the staff dashboards	Instructors, heads of department, deans and the other staff whose login is linked to an Employee record	HR-11	TC-STF-01, 02, 07
Requests and leave from the card	The same people: New Request, Apply for Leave, View, without leaving their dashboard	HR-11	TC-STF-03 to 06
Nothing changes for staff without an Employee record	Their dashboard stays exactly as before	HR-11	TC-STF-08
One set of request windows for both	Employees: nothing visible changes on the Employee Portal	HR-11	TC-STF-09, 10

Before this round, an instructor or head of department had to know the Employee Portal's address to send a request: their login opens their own dashboard. Nothing else changed: Round 1 and Round 2 test cases keep their results.

2 Before you start

1. Ask the developer to confirm that the test site has the Round 3 update (branch `develop` of 27 October, then `bench build` and `clear-cache`). The sign: the My HR card under the figures of an instructor who is linked to an Employee record.
2. Logins (sheet *Test Accounts*): an **instructor linked to an Employee record**, a **head of department** with an Employee record and annual leave, an **instructor without an Employee record** (TC-STF-08), and for TC-STF-07 any other staff login you have (dean, Finance, Admission ...) linked to an Employee record.
3. Open `Medical_HRMS_Jameah_Test_Cases.xlsx`, sheet *Test Cases*, filter **Round = Round 3**. Record each result there; bugs go in *Bug Report* with the date, time, page address and exact message.

> **Only staff linked to an Employee record see the card**
> On the current data most instructors have a login but no Employee record yet: HR links them with the Instructor data sheet (HR-55). Until a login is linked, its dashboard shows no card, which is correct (TC-STF-08). For testing, ask HR to link the test logins first.

3 How to test each change

3.1 Where the card is

The card goes right after the dashboard's first row of figures, in the dashboard's own colours:

Dashboard	Where the card is
Instructor	After Active Class, Total Students, Pending Grading, Total Classes
Department Head	After the coloured figures (My Departments, Total Students ...)
Dean, Vice Deans, IT, Academic Operations	After the first row of the overview
Student Affairs, Admission, Finance, Clinical Training	After the row of figures
Academic Advisor	Under the heading (this dashboard has no figures)

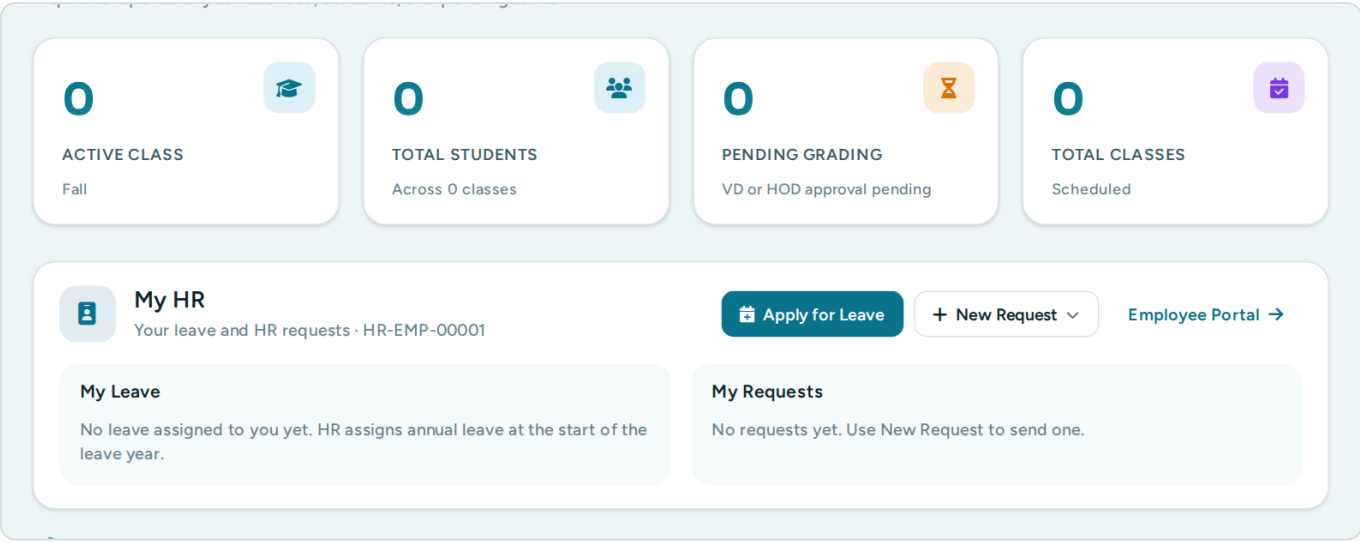

Figure 1. The Instructor dashboard with the My HR card under its figures.

3.2 What the card shows

- **My Leave**: up to three balances, annual leave first (days left, of how many), and the same *what's next* lines as the Employee Portal: a leave waiting for the manager, an approved plan to apply for (**Apply now**), a return to send (**Send Leave Return**) ...
- **My Requests**: the four latest requests with their status, *N waiting* when some wait for a decision, and **View** to open one.
- The buttons **Apply for Leave**, **New Request** (the 11 services of the Employee Portal) and **Employee Portal** (the full list and history).

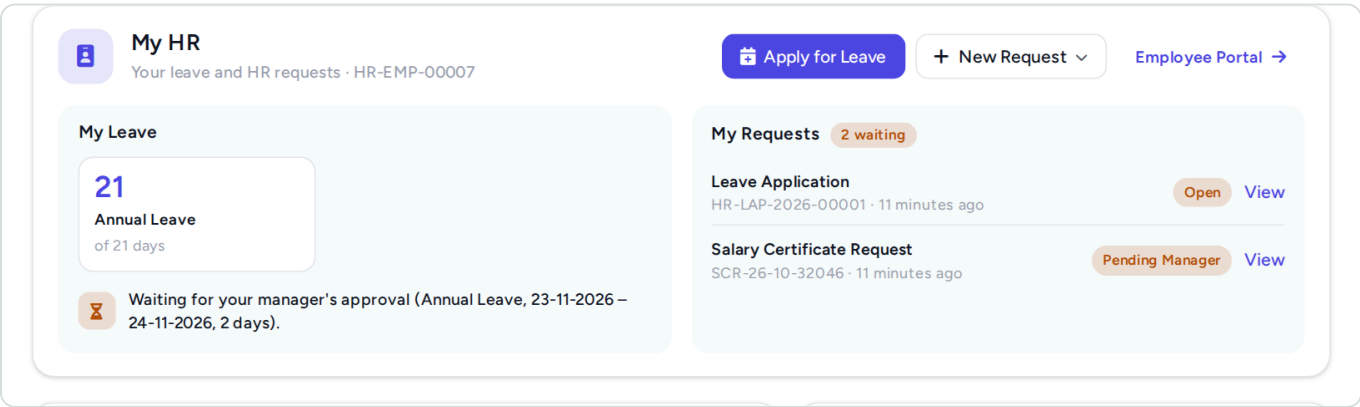

Figure 2. The Department Head dashboard: a leave waiting for the manager, a request waiting for HR.

3.3 Sending from the card

1. **New Request** → pick a service. The same window opens as on the Employee Portal; **Send Request** or **Save Draft**.
2. The card updates by itself: the request is listed as *Pending* and HR is told, as for any request (bell, TC-APR-10).
3. **View** opens the request with its status; after a rejection also the reason, the history and **Send Again** (Round 2).
4. **Apply for Leave** lists only the leave the person holds, with the days left. After sending, *My Leave* shows it waiting for the manager.

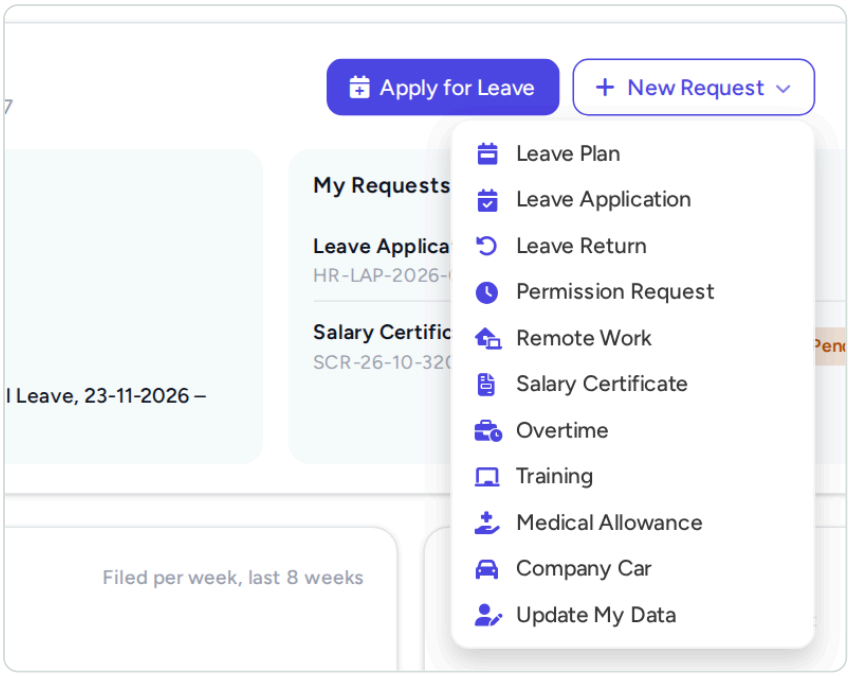

Figure 3. New Request on the card: the 11 services.

3.4 Phone, dark mode and Arabic

On a phone the card's two parts stack and the buttons wrap; nothing scrolls sideways. The dark-mode and language buttons of the dashboard's top bar apply to the card too: in Arabic it reads *شؤوني الوظيفية*, right to left (TC-STF-09).

Figure 4. The card in Arabic.

4 Not in this round, and known limits

- **Staff without an Employee record** see no card until HR links them (HR-55 for instructors, HR-05 for new staff).
- The **Program Manager** and **Proctor** dashboards have no card yet; those staff use the Employee Portal (`/app/employee-dashboard`).
- The card lists the four latest requests; the full list, the leave table and this month's limits are on the Employee Portal.
- Heads of department approving their staff's requests is not part of the card: who approves each step waits for the approver list (DEC-09, HR-24).
- E-mail on the test copy: as in Round 2, notifications appear in the bell only (B-25).
- On the **Advisor** dashboard the browser console shows *frappe.get_open_dialog is not a function*. It comes from the education app's Advisor page, not from the card (B-58, reported to the education app owner): no need to report it again.

5 Round 3 test cases

Full steps and expected results are in the Test Cases workbook (filter **Round = Round 3**).

> **Already checked by the developer**
> The automated browser tests ran the same steps for the cases marked with an automated test in the workbook (column *Last automated run*). Please test them anyway: they can pass there and still fail for you.

ID	Scenario	Login	Priority
TC-STF-01	My HR on the Instructor dashboard	Instructor	High
TC-STF-02	My HR on the Department Head dashboard	Head of department	High
TC-STF-03	Send a request from the card	Instructor	High
TC-STF-04	Open a request from the card	Instructor	Medium
TC-STF-05	Apply for leave from the card	Head of department	High
TC-STF-06	Same requests on the Employee Portal	Instructor	Medium
TC-STF-07	The other staff dashboards	Dean, Finance, Admission ...	Medium
TC-STF-08	Staff without an Employee record	Instructor (not linked)	High
TC-STF-09	Phone, dark mode and Arabic	Instructor	Medium
TC-STF-10	Employee Portal unchanged	Employee	High
